

B.A.HUMUS

0-0-1

GUARANTEED ANALYSIS:

SOLUBLE POTASH (K_2O)..... 1.0%

Derived from Potassium hydroxide.

CONTAINS NON-PLANT FOOD INGREDIENT:

3.3% Humic Acid derived from Leonardite

Weight per gallon: 8.5 lbs. per gallon @ 68°F
(1.02 kg. per liter @ 20°C).

KEEP OUT OF REACH OF CHILDREN WARNING

CAUSES SKIN IRRITATION. CAUSES
SERIOUS EYE IRRITATION.

PRECAUTIONARY STATEMENTS: Wash thoroughly after handling. Specific treatment see First Aid section on this label.

PERSONAL PROTECTIVE EQUIPMENT: Wear protective gloves / protective clothing / eye protection / face protection. Take off contaminated clothing and wash before reuse.

FIRST AID: IF ON SKIN Wash with plenty of water. If skin irritation occurs get medical advice / attention.

IF IN EYES Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists get medical advice / attention.

GENERAL INFORMATION

PHT B.A. Humus may be applied by ground, air, or through irrigation systems. PHT B.A. Humus is compatible with most pesticides and fertilizers. PHT B.A. Humus is effective when applied to all agricultural crops and all soil types. This product is intended to supplement a regular fertilizer program and may not, by itself, provide all the nutrients normally required.

DIRECTIONS FOR USE

A total of 3-10 gallons of PHT B.A. Humus per acre should be applied throughout the growing season. The rate to apply per application is given below. Add approximately one-half of the water to the spray tank before adding PHT B.A. Humus; agitate before adding remaining water, fertilizer or pesticide. Add the pesticide last. Fertilizers and nutrient products with extremely low pH will cause the product to precipitate. Agitation is recommended to prevent precipitation. A compatibility test is recommended before full scale mixing, if the desired combination has not been used in the past. PHT B.A. Humus can be injected into irrigation systems along with fertilizers and pesticides approved for this use. When applied with a pesticide follow the precautionary statements and directions for use given on the pesticide label. PHT B.A. Humus is not corrosive to hoses, pipes and gaskets. The irrigation system must contain a functional check valve, vacuum relief valve and low-pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow.

SOIL APPLIED WITH OTHER NUTRIENTS ON

AGRICULTURAL CROPS: Apply $\frac{1}{2}$ to 3 gallons of PHT B.A. Humus with every application of liquid nutrients.

SIDE DRESS OR SPRAY APPLICATIONS WITHOUT OTHER NUTRIENTS: Apply $\frac{1}{2}$ to 3 gallons per

acre in 4 to 20 gallons of water.

SEED SOAKS, CUTTINGS, AND TRANS-PLANT SOLUTIONS: Apply $\frac{1}{2}$ gallon per 20 gallons of solution.

FOLIAR APPLICATION: In combination with other nutrients apply 1 to 4 quarts per acre. Without other nutrients apply directly to foliage diluted in water at a 20 to 1 ratio.

Warning: This product contains a chemical known to the State of California to cause cancer, birth defects or other reproductive harm. Proposition 65, the Safe Drinking Water and Toxic Enforcement Act of 1986, requires notification of potential exposure to substances identified by the State of California as causing cancer, birth defects or other reproductive harm.
