## GENERAL INFORMATION

**KICKER™** is a highly active ammonium sulfate solution designed to enhance herbicide performance by modifying solution pH and water hardness. The ammoniacal nitrogen in **KICKER™** has been found to promote herbicide (such as glyphosate) uptake in agricultural applications. **KICKER's** use of high quality spray grade ammonium sulfate eliminates cold water sedimentation and nozzle plugging commonly found with dry AMS. **KICKER™** also contains a pH stable antifoam which prevents foaming during tank mixing.
