SUGGESTIONS FOR USE

TREND SORB should be used in spray applications where pesticide requires an ammonium sulfate or ammonium nitrate type additive. It is most beneficial due to its lack of corrosiveness or abrasiveness to spray nozzles.

Herbicides, Defoliants and Desiccants: Use 1 to 2 quarts per 100 gallons of solution.

TREND SORB is designed to enhance herbicides such as Glyphosate Products, and/or any other where ammonium sulfate would be recommended.

NOTE: If the pesticide manufacturer requires the use of a surfactant, then always include a non-ionic surfactant labeled for such use, such as Agri Trend Spreader Sticker. Surfactant must contain at least 90% of active ingredient.

DISPOSAL

Do not reuse empty container. Follow all recommended governmental procedures for disposal of pesticides spray solution. Triple rinse container, empty residue into spray tank. Contact county agricultural commissioner for container disposal information.
