

KELP PLUS

1-0-0.2

GUARANTEED ANALYSIS

TOTAL NITROGEN (N).....	1.0%
1.0% Water Soluble Nitrogen	
SOLUBLE POTASH (K ₂ O).....	0.2%
Zinc (Zn)	1.0%
1.0% Chelated Zinc (Zn)	

Derived From: Protein hydrolysate, Sea Plant Extract from *Ascophyllum nodosum* (Kelp), and Zinc EDTA,

Chelating agent is EDTA (ethylenediaminetetraacetic acid).

AVOID FREEZING, WARM, SHAKE AND RESUSPEND BEFORE USING

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

Manufactured By

**SCIENCE PRODUCTS DIVISION
P.O. Box 584, New Oxford, PA 17350**

Net Content: 250 Gallon (946 liters)

Weight per Gallon: 9.3 lbs.

Net Weight: 2325 lbs.

DIRECTIONS FOR USE

KELP PLUS may be used on all annual or perennial crops.

Apply in foliar or root application systems early in the season and continue throughout the entire growing period. Special emphasis should be given during root flush periods and during flowering, fruit set and sizing stages. Use **KELP PLUS** as a supplement to a well balanced crop management program designed to maximize quality crop production.

Use Rate per Application:

Foliar: ½ to 2 pints per acre

Soil: 1 to 4 pints per acre

Fertigation: May be used under normal practices. **KELP PLUS** should be applied at the end of the irrigation cycle.

Mixing and Product Dilution: Shake **KELP PLUS** and dilute in sufficient water to ensure adequate and even coverage. Examples of dilution rates are listed below per acre.

Aerial: Minimum of 3 gallons

Ground: (Field Crops) 10 to 50 gallons

(Row Crops) 10 to 50 gallons

(Tree and Vine Crops) 50 to 400 gallons

Compatibility: **KELP PLUS** is compatible with many fertilizers that might be injected through fertigation equipment, however it is impossible to evaluate every potential combination. Always run a jar compatibility test before mixing with liquid fertilizers. This product is compatible with most pesticides commonly used on vegetable, fruit and agronomic crops.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>

Use this product in accordance with good agronomic practices, which include utilizing proven spray equipment set for proper coverage. Do not make applications when temperatures are too hot, as crop damage may occur. Applications should be made at temperature levels and when other environmental conditions in your area are such that your experience indicates the application will be compatible and will accomplish the desired result.

The use of this material being beyond our control and involving elements of risk to human beings, animals and vegetation, we do not make any warranty, express or implied, as to the effects of such use, when this product is not used in accordance with the direction as stated on this label.
