# CONTACT

## DEPOSITION AID / DRIFT RETARDANT

### PRINCIPAL FUNCTIONING AGENTS:

PolyvinylPolymer (Polyacrylamide).....	30%
Inert Ingredients (Formulating Aid).....	70%
TOTAL.....	100%

All ingredients are accepted for use under 40 CFR 180.

## CAUTION

### KEEP OUT OF REACH OF CHILDREN

Before using this product, read the entire label, including the conditions of sale. May be harmful if swallowed, inhaled, or contact is made with skin or eyes. Breathing excessive concentration of vapors can cause dizziness. Always wear personal protective equipment as mandated by the label of the pesticide tank mix partner(s) being used. Follow manufacturer's instructions for cleaning and maintaining PPE.

### FIRST AID

Call a poison control center or doctor immediately for treatment advice.

**If Swallowed:** Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

**If on Skin or Clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

**If Inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible.

**If in Eyes:** Hold eye open and rinse slowly and gently with water for 15- 20 minutes. Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye. Have the product container with you when calling a poison control center or doctor, or going for treatment.

## NET CONTENTS: 1 QUART

## GENERAL INFORMATION

**CONTACT** will retard, but cannot totally eliminate, drift hazards due to variations in pesticide usage, application conditions and techniques, as well as sensitive vegetation near the target application area. Minimizing spray drift is the responsibility of the applicator.

**CONTACT** Drift Retardant and Deposition Aid reduces drift risk and maximizes pesticide performance by binding Ultra Small Spray Particles together into larger droplets which are more capable of hitting their intended target. **CONTACT**'s refined use rates and low "phase out" formulation make it the easiest to use liquid drift retardant.

## DIRECTIONS FOR USE

Dosages may be adjusted to compensate for environmental conditions or mechanical factors. Lower dosages may be used when spraying under calm winds, slow application speeds, low pressures, and lower boom heights with nozzles closer to the target. The greater the shear on the spray boom nozzle head, the greater the spray droplet fragmentation, which produces fines (mists) that may drift to non-targeted areas or evaporate.

## MIXING

**CONTACT** is very concentrated and performs effectively at ultra-low use rates even as low as 1-4 oz. per 100 gal. of water. Start with low dosage rates and increase as needed. A thickened or "stringy" solution indicates, that too much **CONTACT** has been used.

**Step 1.** Select proper dosage for the spraying operation.

**Step 2.** Fill mix tank with water, pesticide, fertilizer, surfactant/additives and agitate.

**Step 3.** Shake bottle well before using.

**Step 4.** For best mixing results, either (1) inject **CONTACT** liquid into the suction side of the feeder or recirculating pump to obtain adequate dispersion of the polymer throughout the pesticide solution, or (2) slowly add **CONTACT** liquid to the agitating tank mix at the area of highest turbulence.

**Step 5.** Continue to agitate mix tank for at least 3 minutes before spraying.

**Step 6.** Follow all cleanup precautions on label of pesticide used.

## APPLICATION OR USE RATES DOSAGE CHART

Spray Pressure	Nozzle Orientation	CONTACT DOSAGE
Aerial applied below 45 psi:	Straight Back	2 - 6 oz. / 100 gals.
	45° Angle Back	4 - 8 oz. / 100 gals.
GROUND APPLICATION		
Low (below 30 psi):	Flat Fan, Flood	1 - 4 oz. / 100 gals.
	Off-Center	3 - 5 oz. / 100 gals.
Medium (30 - 50 psi):	Flat Fan, Flood	3 - 4 oz. / 100 gals.
	Off-Center	4 - 6 oz. / 100 gals.
	Spray Guns	5 - 8 oz. / 100 gals.
High (over 50 psi):	Spray Guns	8 - 32 oz./ 100 gals.

Higher spray pressure or greater agitation requires higher rates to maintain good drift control. If unacceptable drift is still occurring, add additional **CONTACT** in increments of 1 oz. per 100 gal. of spray solution.

## STORAGE AND DISPOSAL

Store in original container only. If product freezes, bring to room temperature and mix thoroughly before use. Prevent water from being introduced into the contents of this package. Do not reuse empty container and dispose of it in accordance with federal, state and local regulations.

## WARRANTY

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label, when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
