

GreenSun® Zinc 18

Soil Application Only

0-0-0

GUARANTEED ANALYSIS

Sulfur (S) 65.0%
Zinc (Zn) 18.0%

Derived from: elemental sulfur and zinc oxide.

PRODUCT DESCRIPTION

GreenSun® Zinc 18 is a pastille-shaped micronutrient which is formulated using new and improved methods as compared to other conventional granular micronutrients. It is superior to other zinc materials in its handling and blending characteristics, contains very little dust, and has a very uniform granule size. **GreenSun® Zinc 18**, when used in conjunction with a balanced fertility program, can provide a season-long source of plant available zinc. **GreenSun® Zinc 18** is recommended for all crops, and especially those with high zinc requirements (corn, potatoes, rice, onions, edible beans, and flax). Because of its high sulfur content, **GreenSun® Zinc 18** will also improve soil sulfur levels as well as replenish sulfur loss associated with soluble plant nutrients.

PHYSICAL PROPERTIES

Density	80 lbs/ft ³
Granule Size	SGN 260
Total elemental sulfur (S)	0.65 lbs.
Total elemental zinc (Zn)	0.18 lbs.
Angle of repose	29 degrees

GENERAL APPLICATION AND USE RECOMMENDATIONS

GreenSun® Zinc 18 provides agronomic and economic benefits in an easy to use pastille form. It can be blended with other granular or prilled fertilizers or applied alone. Proper timing, rate, and placement is important for desired results and highly dependent on stage of crop growth, soil fertility levels, and environmental conditions. With surface applications, a light incorporation in the soil will assist in even distribution of the micronutrient particles. If **GreenSun® Zinc 18** is not applied on a regular basis, or if soil zinc levels are reported as severely deficient, then a soluble source of zinc should be applied in conjunction with this product. Applications rates vary from 5 to 25 lbs/acre as determined by crop and soil test zinc levels.

HANDLING AND STORAGE

GreenSun® Zinc 18 should be stored and blended (if applicable) in a well-ventilated location to minimize accumulation of dust. Always use stringent dust control procedures to prevent a concentration of flammable dust from reaching a spark or flame source. **GreenSun® Zinc 18** should not be blended or stored with strong oxidizing agents. Avoid inhalation of dust if possible. Avoid contact with skin and eyes. Wear proper protective equipment when handling. Dispose of used bags in accordance with local, state, and federal regulations.
