

DEPOSITION AID / DRIFT CONTROL AGENT

SEDATE[™] is a deposition aid/drift control agent, which uses a proven chemistry, that enhances the droplet spectrum of certain spray solutions without altering the viscosity.

PRINCIPLE FUNCTIONING AGENTS

Lecithin, emulsifiers and other ingredients 100%

All ingredients are exempt from tolerance requirements under 40 CFR 180.

CAUTION KEEP OUT OF REACH OF CHILDREN

Avoid contact with skin, eyes or clothing. May be harmful if absorbed through the skin. Wear chemical resistant gloves.

FIRST AID

Call a poison control center or doctor immediately for treatment advice.

If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present, after the first 5 minutes, then continue rinsing the eye. Get medical attention.

If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

If Swallowed: Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible.

GENERAL INFORMATION

SEDATE™ uses a proven chemistry that enhances the droplet spectrum of certain spray solutions, without altering the viscosity. The percentage of fine droplets, which are the most susceptible to drift, is significantly reduced, thereby increasing deposition and reducing drift of the spray away from the target.

Unlike viscosity modifying deposition aid/drift retardants, **SEDATE**™ will not significantly increase the number of extremely large droplets that reduce deposition. Viscosity modifying agents, such as hydroxypropylcellulose based products, may reduce deposition by increasing bounce and runoff of the leaf surface.

SEDATE™

- Is designed for use only with glyphosate and other similar water-soluble active ingredients.
- Will not significantly alter the droplet spectrum of oil-soluble herbicides and other oil-soluble pesticides.
- May be used with any glyphosate or similar active formulation, that requires or recommends the use of a deposition aid and/or drift control agent.

DIRECTIONS FOR USE

One rate for all applications - 1 pint per 100 gallons of solution

If the pesticide label does not give directions for using a deposition aid or drift control product, follow these steps for best results:

- 1. Fill mix tank 1/2-3/4 full of water.
- 2. Add pesticides, fertilizer, surfactants/additives, etc. in the order recommended on the label.
- 3. Add SEDATE™.
- 4. Continue to agitate and fill tank the rest of the way with water.

SEDATE™ improves deposition and retards drift, by producing a uniform spray pattern of commonly used water soluble pesticides. The degree of drift hazard varies with the type of pesticide and application conditions. This product will reduce drift but not eliminate drift.

ALWAYS FOLLOW THE LABEL DIRECTIONS PROVIDED BY THE PESTICIDE MANUFACTURER

STORAGE AND DISPOSAL

Storage: Store in original container. Do not reuse container. Keep container tightly closed when not in use. Product will become thick at cooler temperatures, but remains stable.

Disposal: Do not contaminate water, food, or feed by storage or disposal. Wastes may be disposed of on site, or at an approved waste disposal facility. Triple rinse (or equivalent), and add rinse water to spray tank. Offer container for recycling or dispose in an approved sanitary landfill, or by other procedures approved by appropriate authorities.

Conditions of Sale and Warranty Limitation: The Directions for Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of West Central Inc. or the seller. All such risks shall be assumed by the buyer. West Central Inc. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions for Use, subject to the inherent risks referred to above. West Central Inc. makes no other express or implied warranty of fitness or merchantability or any other express or implied warranty. In no case shall West Central Inc. or the seller be liable for consequential, special or indirect damages resulting from the use or handling of this product. West Central Inc. and the seller offer this product, and the Buyer and the User accept it, subject to the foregoing Conditions of Sale and Warranty, which may be varied only by agreement in writing signed by a duly authorized representative of West Central Inc.
