GENERAL INFORMATION

Zéba® is a biodegradable, non-toxic, starch-based superabsorbent
polymer. It is designed to rapidly absorb and maintain moisture in
the root zone, releasing moisture to plants as needed.

STORAGE INSTRUCTIONS

Zéba can be stored and shipped in fiberboard, plastic container, or
poly-lined bag. Maintain product under dry storage conditions.

USE DIRECTIONS

Agricultural Crops
Apply Zéba 4-6 inches (10-15 cm) below the soil surface in
proximity to root zone at a rate of 5-10 lbs. per acre (1.5-1) kg per
hectare). Use higher rates of 7-10 lbs. per acre (1.5-1) kg per
hectare) in soil with low moisture holding capacity for optimal
moisture retention. See your crop advisor for optimal rate in your
crop and soil type. Also see Zéba User Guide or website at
www.zeba.com for specific instructions.

Newly Planted Trees & Vines

For new plantings, use 1 Tbsp. - 2 Tbsp. per tree. Place half the
Zéba in the planting hole and mix the remaining half in the
backfill soil.

Anti-Crustant

As an anti-crustant, to aid in germination and stand
establishment, band directly over the seed row before the press
wheel. Apply at 2-4 lbs of Zéba per acre (1.5-5 Kg of Zéba per
hectare).
