General Information

CHEM-SUPRA CHARGE PLUS is a unique soil and plant substance in a humic intended for applications on row crops and vegetables. **CHEM-SUPRA CHARGE PLUS** is a natural organic compound used in the establishment and maintenance of all crops.

CHEM-SUPRA CHARGE PLUS is an blend of organic biostimulant that contains a natural plant growth agents with organic humus and can be tank mixed with most pesticides, herbicides, defoliants and liquid, soil and foliar fertilizers including acid fertilizers.

CHEM-SUPRA CHARGE PLUS dilutes readily with water for spray, dribble or injection applications in irrigation systems.

CHEM-SUPRA CHARGE PLUS is not a plant food but will aid in plant growth.

Directions for use:

For use on the following crops:

Alfalfa, almonds, avacados, apples, barley, beans, broccoli, cabbage, cauliflower, carrots, celery, citrus, corn, grapes, lettuce, milo, melons, nectarines, rice, pears, peaches, pecans, peppers, peanuts, pineapple, potatoes, sorghum, soybeans, sugar beets, sweet corn, sugar cane, strawberries, tomatoes, turnips. walnuts, watermelons, wheat and most other crops.

When spraying always us slotted screen or 50 mesh or larger in line and nozzles.

Broadcast application:

Apply on soil surface prior to planting at 1-2 quarts per acre. Can be applied with liquid fertilizer.

In-Row application:

Apply at 1 quart per acre in furrow at planting. Can be applied with liquid starter fertilizer.

Dry Prilled/Granular Fertilizer:

Impregnate 1 to 2 quarts per acre on fertilizer blend.

Sidedress application:

With row crops, apply with fertilizer on both sides of the row, at 1 quart per acre .

Foliar Spray:

Spray on young plants at 1 quart per acre in conjunction with foliar nutrients.

CHEM-SUPRA CHARGE PLUS can be applied through drip, center pivot, permanent solid setor self-propelled wheel move irrigation systems equipped with automatic shutoff devices and valves to prevent backflow into the water source. Interlocking controls should be installed between the water pump and the injection pump so that both pumps stop if either one should fail.
