

CHEM-EXTRA

K

Powered by Manni-Plex® Technology

GENERAL INFORMATION

MANNI-PLEX products are specifically formulated for foliar delivery of micronutrients.

Vegetables and Fruit Trees

Apply 2-5 quarts CHEM-EXTRA K per acre per application. When applying CHEM-EXTRA K on vegetable crops, use a sufficient volume of water to ensure thorough coverage. A minimum of 10 gallons per acre is recommended.

Foliar Application Row Crops

Apply 1-2 quarts CHEM EXTRA K per acre per application at desired application time. Use a sufficient volume of water to ensure thorough coverage. A minimum of 10 gallons per acre is recommended.

Soil Application

Can be made pre-plant or side-dressed at a rate of 1-4 gallons per acre.

CHEM-EXTRA K may effectively be applied with many agricultural chemicals. For unfamiliar tank mix combinations sufficient evaluation to determine efficacy and crop safety may be warranted. Avoid tank mixing with phosphate and/or excessively alkaline based fertilizer solutions. Use a minimum 10 gallons of water per acre with ground spray equipment and a minimum of 2 gallons for aerial application. Optimum rate of application will vary depending on your soil properties such as soil pH, organic matter content, soil texture, weather conditions, time of year, general crop health and species. For best results, follow soil test or plant analysis recommendation.

Information concerning the raw materials composing the product in this container can be obtained by writing to CNI Agriminerals and referring to the product name.

MIXING INSTRUCTIONS

Put 1/3 to 2/3 of total desired water volume in tank. Add adjuvant(s) if desired and agitate until thoroughly mixed. Add desired amount of CHEM-EXTRA K and agitate until thoroughly mixed. Add pesticide(s) if desired and agitate until thoroughly mixed. Fill tank with remainder of desired water. A jar test is a good field practice for evaluating compatibility of multiple chemical mixtures.

CAUTION: CHEM-EXTRA K has a pH between 12-13 and may not be compatible with pesticides that degrade in alkaline conditions. Check compatibility with chemical mixtures especially non-chelated micronutrients.

Weight Per Gallon: 11.1 lbs.

Freezing Temperature: 32° F

CAUTION: KEEP OUT OF REACH OF CHILDREN

CONDITIONS OF SALE: CNI Agriminerals (Company) warrants that this product conforms to the chemical description of the label and is reasonably fit for the purposes stated on the label when used in accordance with the directions under normal use. This warranty does not extend to the use of this product contrary to label instruction, or under abnormal use conditions, or under conditions not reasonably foreseen by the Company. The Company disclaims all other warranties, expressed or implied, including any warranty of fitness or merchantability. The Company shall not be liable for consequential, special, or indirect damages resulting from the use or handling of this product, and the Company's sole liability and buyer's and user's exclusive remedy shall be limited to the refund of the purchase price. Buyer and seller acknowledge and assume all risks and liability resulting from handling, storage and use of the product. The Company does not authorize any agent or representative to make any other warranty, guarantee or representation concerning this product.
