

Leaf-MAX II™

GUARANTEED ANALYSIS

Magnesium (Mg)	3.50%
Zinc (Zn)	2.50%
Derived from magnesium carbonate and zinc carbonate	

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS

38% PHOSPHOROUS ACID

GENERAL RECOMMENDATIONS

Leaf-MAX II is designed for foliar use to help maximize nutritional requirements needed for proper leaf development, plant growth, and bud quality. It is most effective when applied just prior and during strong vegetative growth phases. Can also be used post-harvest to help nutrient storage and bud strength. When applying post-harvest, leaves must be in good condition for maximum benefit. Do not apply on plants where leaf senescence has begun, as benefits will be limited.

DIRECTIONS FOR USE

Leaf-MAX II may be mixed with insecticides and/or fungicides. When mixing, dilute fully in the spray tank and add fungicide or insecticide last. May also be used with other nutrients but caution should be used when mixing with phosphorus and/or potassium based fertilizers. Always dilute first before adding other fertilizers. For specific recommendations consult with your Wilco Field Representative.

SHAKE WELL BEFORE USING

APPLICATION RATES

The recommended application rate is 2-4 quarts per acre. Most effective timings for application are 1) at the beginning of and during a strong foliar growth, 2) when tissue analysis shows a need for zinc and/or magnesium, and 3) within 2-4 weeks post harvest to improve nutrient storage in the buds and winter hardiness.

STORAGE AND HANDLING

Store in a cool, dry place. Keep container tightly closed and out of direct sunlight during storage for extended amounts of time. Do not add water or other material to the container. Do not contaminate water, food, or feed by storage or disposal. **Store above 32°F.**

IRRIGATION STATEMENT

Applications can be made through certain irrigation systems including, but not limited to, low volume systems and typical agricultural sprinkler systems. The specific injection equipment and irrigation system must conform to all federal, state and local regulations pertaining to the fertilization of plants through an irrigation system. Accurate and properly calibrated injection equipment and an irrigation system that is operated at maximum distribution uniformity will help avoid plant injury and/or product ineffectiveness. For best results, with the exception of center pivot and lateral systems, apply this product toward the end of the irrigation set. Allow sufficient time for the product to be flushed completely out of the entire irrigation system prior to turning off the irrigation water. Contact your Certified Crop Advisor for specific recommendations for your area.

PRECAUTIONARY STATEMENT

As with all materials, user should exercise precaution to avoid potential phytotoxicity including foliar burning. Precaution is advised if applying this product in combination with other materials, a jar test for compatibility is recommended before tank mixing with other products. The pH of any final spray solution should be checked and an appropriate amount of the solution should be applied to a small area of the intended crop to ensure plant compatibility prior to the planned application. User assumes full responsibility to ensure product, equipment and plant compatibilities. **CAUTION: KEEP OUT OF REACH OF CHILDREN, HARMFUL IF SWALLOWED, PERSONAL PROTECTIVE EQUIPMENT RECOMMENDED, AND INTENDED FOR AGRICULTURAL USE. CONSULT MATERIAL SAFETY DATA SHEET FOR FURTHER INFORMATION.** In the event of a spill, clean-up promptly using trained personnel and pre-planned procedures and/or contact CHEMTREC at 1-800-424-9300 for assistance.

CONDITION OF SALE

Seller warrants that this product conforms to its chemical description as stated on the label. The product is reasonably fit for the purpose stated on the label when used in accordance with the label directions and instructions under normal conditions of use. Neither this warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions or under abnormal conditions or under conditions not foreseeable to the seller. Buyer assumes the risk of any such use.
