# Steric® Micro Boron 2%™

Target Market

**VEGETABLE, FIELD AND PERMANENT CROPS**

Target Usage/  
Application

**FOLIAR OR SOIL NUTRIENT**

### GUARANTEED ANALYSIS

Total Boron (B).....2.00%  
*Derived from boric acid*

### GENERAL INFORMATION

This soil nutrient is an effective, readily available for soil and foliar application. It may be applied in water or mixed with most liquid fertilizers, micronutrients, or pesticides.

### DIRECTIONS FOR USE

Mixing Sequence: 1. Water 2. Product 3. Other chemicals

Use as least 1 gallon of water for each pint of product applied to the crop.

**Foliar Application:** Apply with enough carrier to cover all foliage. Early morning or late evening applications give best results. The product is not easily translocated within the plant, therefore multiple foliar applications at low rates during the growing season are most effective

**Soil Application:** Soil-applied product must be moved into the root zone to be absorbed by the plant. This can be accomplished by irrigation, rainfall, or tillage. For soil use in tree crops, incorporate product into the soil by irrigation or tillage within the drip line.

### WARNING

Over-application or excessive use of boron can result in boron toxicity. This may cause foliar damage or serious crop injury. The proper use of soil test recommendations will minimize the risk of over-application of boron.

### APPLICATION RATES

#### FOLIAR APPLICATIONS

##### Fruit and Nut Crops

Apples..... 2 to 4 quarts  
Filberts..... 1 to 3 quarts  
Grapes..... 4 to 10 quarts  
Pears, Citrus, Cherries,  
Peaches, Plumes, Prunes..... 4 to 8 quarts

##### Field Crops

Alfalfa, Sugar Beets..... 4 to 8 quarts  
Canola, Cotton, Flax, Corn, Hops, Peanuts, Soybeans,  
Sugarcane, Sunflowers, and Wheat..... 2 to 4 quarts  
Clover..... 4 to 6 quarts

##### Vegetable Crops

Beets, Carrots, Cucumbers, Peppers, Tomatoes, Potatoes,  
Peas, Lentils, and Beans..... 2 to 4 quarts  
Broccoli, Cabbage, Cauliflower,  
Celery and Melons..... 4 to 8 quarts

#### SOIL APPLICATIONS

##### Fruit and Nut Crops

Apples..... 2¼ to 6 gallons  
Filberts, Grapes Pears, Citrus, Cherries,  
Peaches, Plumes, Prunes..... 2 to 4 gallons

##### Field Crops

Alfalfa, Sugar Beets..... 2 to 6 gallons  
Clover, Corn..... 2 to 4 gallons  
Soybeans, Sugarcane..... 2 to 3 gallons  
Canola, Cotton, Flax, Hops, Peanuts,  
Sunflowers, Wheat..... 1 to 2 gallons

##### Vegetable Crops

Beets, Carrots, Cucumbers, Peppers, Tomatoes,  
Potatoes, Peas, Lentils, and Beans..... 2 to 4 gallons  
Broccoli, Cabbage, Cauliflower,  
Celery and Melons..... 2 to 6 gallons

### STORAGE AND HANDLING

Store in a cool, dry place. Keep container tightly closed and out of direct sunlight during storage for extended amounts of time. Do not add water or other material to the container. Do not contaminate water, food, or feed by storage or disposal. Store above 32° F.

### IRRIGATION STATEMENT

Applications can be made through certain irrigation systems including, but not limited to, low volume systems and typical agricultural sprinkler systems. The specific injection equipment and irrigation system must conform to all federal, state and local regulations pertaining to the fertilization of plants through an irrigation system. Accurate and properly calibrated injection equipment and an irrigation system that is operated at maximum distribution uniformity will help avoid plant injury and/or product ineffectiveness. For best results, with the exception of center pivot and lateral systems, apply this product toward the end of the irrigation set. Allow sufficient time for the product to be flushed completely out of the entire irrigation system prior to turning off the irrigation water. Contact your Certified Crop Advisor for specific recommendations for your area.

### PRECAUTIONARY STATEMENT

As with all materials, user should exercise precaution to avoid potential phytotoxicity including foliar burning. Precaution is advised if applying this product in combination with other materials, a jar test for compatibility is recommended before tank mixing with other products. The pH of any final spray solution should be checked and an appropriate amount of the solution should be applied to a small area of the intended crop to ensure plant compatibility prior to the planned application. User assumes full responsibility to ensure product, equipment and plant compatibilities. **CAUTION: KEEP OUT OF REACH OF CHILDREN, HARMFUL IF SWALLOWED, PERSONAL PROTECTIVE EQUIPMENT RECOMMENDED, AND INTENDED FOR AGRICULTURAL USE. CONSULT MATERIAL SAFETY DATA SHEET FOR FURTHER INFORMATION.** In the event of a spill, clean-up promptly using trained personnel and pre-planned procedures and/or contact CHEMTREC at 1-800-424-9300 for assistance.

### CONDITION OF SALE

Seller warrants that this product conforms to its chemical description as stated on the label. The product is reasonably fit for the purpose stated on the label when used in accordance with the label directions and instructions under normal conditions of use. Neither this warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions or under abnormal conditions or under conditions not foreseeable to the seller. Buyer assumes the risk of any such use.
