

General Information:

NUE MicroPlus B is manufactured specifically as a liquid foliar fertilizer to be used to help prevent and correct boron deficiencies that may limit crop growth and yields.

NUE MicroPlus B is a supplement to an adequate and balanced soil fertility program.

It is important to monitor crop needs and responses by maintaining an adequate tissue-testing program. When unfamiliar with the effects of foliar applications of minerals it is recommended to perform small-scale field trials.

Directions for Use:

Mixing Directions - Be sure spray tank is thoroughly cleaned, fill 1/3 full with clean water, add product and continue filling with agitation. Always add this product to tank before adding pesticides.

Compatibility - Always do compatibility tests before mixing with phosphate products. Consult your Bio-Gro dealer for more information.

Applications - **NUE MicroPlus B** can be applied by ground and aerial equipment.

Dilution and Spray Volumes - Always use enough water for uniform application and to prevent possible plant tissue damage to the intended crop from concentrated droplets. It is recommended to use a dilution of at least 100 parts of water to 1 part of **NUE MicroPlus B**

Mixing Caution: **NUE MicroPlus B** can effect pH values and other characteristics of spray mixtures. Be sure that this product does not adversely effect the performance of this product or products it is applied with.

Warning: This fertilizer contains Boron. Its use on any other plants or under any other conditions other than those specified on this label may result in plant injury.

Guaranteed Analysis

Boron (B) 5%

Derived from: Boric Acid

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS:

20% Soluble Seaweed Extract

Derived from Ascophyllum Kelp Meal

Keep out of Reach of Children

CAUTION

Harmful if swallowed, inhaled or absorbed through skin. May cause eye and skin irritation. In case of contact, immediately flush eyes and/or wash skin with plenty of fresh water for at least 15 minutes.

Do not contaminate feed or food items.

Use caution in application to assure coverage on intended treatment areas only.

CONDITIONS OF SALE

Seller and/or manufacturer warrants only that this product consists of the ingredients specified on this label. No one is hereby authorized to make any warranty and/or guarantee concerning the use of this product. Being that the use, timing, placement, rate, application and other conditions are beyond the control of the seller and/or manufacturer, the seller's and/or manufacturer's liability for handling, storage and use of this product is limited to replacement of product or refund of purchase price.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>

Suggested Applications:

Optimum rate of application will vary between fields depending on soil and/or climatic conditions, stage of crop growth and size of plants. Application rates are best determined by soil and plant analysis recommendations.

NUE MicroPlus B can be used on many crops where foliar Boron applications are commonly used. Consult your Bio-Gro dealer for specific recommendations.

Tree Crops: Apples, Citrus, All Nut Crops, Pears, Stone Fruit; Apply 1-3 quarts/acre to actively growing foliage. Apply at pink and petal fall and 1-2 weeks prior to fruit drop. Do not apply foliar applications of **NUE MicroPlus B** under poor drying conditions or in excess heat. Dilute spray in at least 100 gallons/acre of water.

Beans: Dry, succulent & limas. Apply 1 to 2 quarts/acre at bud stage to early bloom.

Corn: Foliar apply 1-4 pints/acre at early tassel stage.

Cane: Caneberries, Blueberries & Strawberries; Foliar apply 1-4 pints/acre at post bloom.

Forage Crops: Including, but not limited to; alfalfa, clover and pasture. Apply 1 to 4 pints/acre at 2"-6" high, repeat after each cutting.

Grapes: Foliar 2 to 8 pints/acre from first leaves to early bloom stage.

Hops: Foliar 1-2 quarts/acre as needed, prebloom.

Legume Crops: Including, but not limited to; beans, chick peas, lentils & peas. Apply 1 to 2 pints/acre from bud stage to 1/2 bloom. DO NOT apply after pod set.

Seed Crops: Including, but not limited to; cabbage, broccoli, carrots, cauliflower & beets. 1-2 quarts/acre prebloom.

Small Grain Crops: Including, but not limited to; barley, oats, rice, rye & wheat. Apply 1-4 pints/acre before flag leaf emerges.

Turf & Horticultural: Apply 1-2 pints per acre ONLY as recommended by a qualified Bio-Gro, Inc. agronomist.

Vegetable Crops: Including, but not limited to; carrots, cole crops, cucurbits, lettuce, melons, onions, potatoes and tomatoes. Apply 1 to 4 pints/acre at appropriate stages of growth and development.
