

General Information

CHB Zinc 10% is produced in an exclusive base that may facilitate uptake and minimize tie-up of zinc in the soil. Zinc is essential in the formation and activity of chlorophyll, functioning of enzymes and formation of the growth hormone auxin.

CHB Zinc 10% is a part of the Bio-Gro, Inc. CHB line of primary (N, P & K), secondary (Ca & Mg) and micronutrients (Zn, Mn, Cu, B & Fe) manufactured specifically as a liquid fertilizer to help prevent and correct nutrient deficiencies that may limit crop growth and yields. **CHB Zinc 10%** is a supplement to an adequate and balanced soil fertility program. We recommend that you consider proper placement and application timing.

Directions for Use

Compatibility - CHB Zinc 10% can be blended with various liquid fertilizers. Caution should be used when blending with phosphate fertilizers. Certain forms of phosphate are compatible with CHB Zinc 10%. Always conduct a jar test if you are uncertain about compatibility or consult your Bio-Gro, Inc. dealer for more information.

Mixing - Shake, stir, or swirl contents before using.

Applications - CHB Zinc 10% can be applied by ground equipment and through irrigation systems. Recommended soil applications include banding and broadcast. Recommended fertigation methods include water run, sprinkler and drip irrigation. When using high rates avoid direct contact with living plant material or ensure an adequate volume of water to dilute CHB Zinc 10% on plant surface.

Suggested Applications

Optimum rate of application will vary between fields depending on soil and/or climatic conditions, stage of crop growth and size of plants. Application rates are best determined by results from soil/plant analysis. For this reason we recommend that you contact your qualified Bio-Gro, Inc. product representative or agronomist with soil/plant analysis for evaluation.

General Soil Applications for all crops:

Maintenance – 1 - 2 qts./acre

Moderate Deficiency – 2 - 4 qts./acre

Severe Deficiency – 1 - 5 gal./acre

Fertigation: Apply the required amount of product in split applications one to two weeks apart throughout the growing season.

**"Approved material under
Washington State Department
of Agriculture organic
food program"**

When applying CHB Zinc 10% on organically certified crops, soil deficiency must be first documented by testing.
