

Shine™ K

For Trees, Vines, Field and Row Crops

GUARANTEED ANALYSIS

0-0-20

Soluble Potash (K₂O).....20.0%

Derived from: potassium acetate, potassium citrate and potassium carbonate

GENERAL INFORMATION

Shine™ K is a liquid foliar fertilizer, providing a readily available source of Potassium to correct deficiencies during primary growth stages. Shine™ K can be applied to trees, vines, field or row crops throughout the year, but is most beneficial when applied during sizing and ripening, and during periods of limited potassium availability.

This material contains 2.15 lbs of Soluble Potash, as K₂O, in each gallon. Shine™ K is for use in foliar sprays. It is intended to be a supplement to a fertility program. Always monitor crop nutrient needs and responses with a soil, leaf tissue and irrigation water analysis program.

DIRECTIONS FOR USE

Shine™ K may be foliar applied. In a clean spray tank, add any dry powders and water and agitate. Add other liquid fertilizers first and then add Shine™ K, continuing agitation. Always add Shine K to the tank before adding any pesticides. Concentration of this material should not be less than 0.5% or exceed 5% (volume to volume) in the finished spray solution. Always use enough water for uniform application and to prevent possible plant tissue damage to the intended crop from concentrated droplets. Contact your Source to Source representative for ultra-low volume rates. Apply during the cool part of the day, or when temperatures are below 85° F. Do not apply under windy conditions, or other conditions that promote fast drying of leaf surfaces. Do not store diluted material.

Foliar Spray Concentration Ratio Examples:

Minimum amount of product (0.5% Concentration)	Maximum amount of product (5% Concentration)	Finished Spray Solution
1 quart*	3 quarts	15 gallons
1 quart*	4 quarts	20 gallons
1 quart	2 gallons**	50 gallons
2 quarts	2 gallons**	100 gallons
3 quarts	2 gallons**	150 gallons

See SUGGESTED RATES AND TIMINGS below for rates per acre.

*1 quart is the minimum application rate per acre.

**2 gallons is the maximum application rate per acre.

Shine™ Calcium

Shine™ 2-13-13+Micros

Shine™ 1-11-12+Seaweed

COMPATIBILITY

Shine™ K has a neutral pH and is compatible with many commonly applied nutrients and crop protection products. Contact a Source To Source representative for a list of compatible mixes. Jar test for compatibility prior to mixing with any pesticides, fertilizers or fertilizer blends. For unfamiliar mixes, an appropriate amount of the final mix should be applied to a small area of the intended crop to ensure plant compatibility prior to the planned application. User assumes full responsibility to ensure product, equipment and plant compatibilities. For best results, buffer all tank mixes to a final pH of 6.0-7.0. When tank mixing this product with pesticides requiring specific pH ranges, always follow pesticide label directions.

SOURCE TO SOURCE

SUGGESTED FOLIAR APPLICATION RATES

FRUIT & NUT TREES & GRAPE VINES & OTHER VINES: Apply 1 gal per acre every 7-10 days as needed, starting at bud swell or early shoot development. Avoid applications during bloom. It is also recommended to apply 1-2 gals per acre:

- When fruit or nuts are sizing
- With all summer sprays
- Prior to and during the fruit coloring or ripening process

VEGETABLE CROPS: Apply .25-1 gal per acre in 10-14 day intervals. In transplants, begin applications after new roots are established, or at 2" to 5" growth on direct seeded crops.

FIELD & ROW CROPS: Apply .25-2 gals per acre. Begin applications at 6" of growth, and repeat in 10-14 day intervals through harvest.

COTTON: Apply 1-1.5 gals per acre starting at flower initiation and repeat in 7-10 day intervals through peak boll development.

AGITATION BEFORE USE IS RECOMMENDED

STORAGE/SHELF LIFE/DISPOSAL

Store in original containers at temperatures above freezing. Dispose waste at approved disposal facility. To dispose of containers, triple rinse and dispose according to local and state regulations.

CAUTION: KEEP OUT OF REACH OF CHILDREN.

Harmful if swallowed. May cause eye and skin irritation.

NOTICE: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. Buyer shall assume all risks of use including, but not limited to crop injury, ineffectiveness or other unintended consequences as may result because of such factors as weather conditions, presence of other materials or the manner of use or application, all of which are beyond the control of the seller. In no case shall Source to Source be liable for consequential, special or indirect damages resulting from the use or handling of this product.
