Sea-Stim™

virgin liquid seaweed concentrate

This product is intended for use according to an approved organic system plan. Sea-Stim™ is a complete and unaltered liquid seaweed concentrate designed to enhance plant health through the provision of nitrogen and potassium. Verify with your organic certifier before using.

application methods, rates and timing:

This product is recommended for soil and foliar applications and should be used only in accordance with manufacturer's directions. Sea-Stim™ can be used in the row, added to a row starter, at a rate of 1-2 quarts per acre. Use as a foliar on broad acre commodity crops at 1 quart per acre, every 3-4 weeks. Use as a foliar on fruit and vegetable crops at 1 pint per acre per week. In irrigation, apply 1-2 quarts per acre every 10-14 days.

Maximum target particle size contained in this product is 100 Mμ. Use appropriate spray screens.

ALWAYS perform a jar test when mixing with any other fertilizer. Store container in a cool, dark place, away from direct sunlight or heat. Agitate well before using. Failure to do so may result in degraded or unsatisfactory performance and/or usability.
