PRODUCT INFORMATION

Start-up 7% Zinc Chelate Solution was formulated for use with basic starter fertilizers pH 6 or higher at planting time. Start-up 7% Zinc Chelate Solution can be incorporated in basic liquid fertilizers at time of planting, side dressing application, or other situations where it is difficult to get micronutrients to the root zone.

Start-up is composed of organic carriers of Citric Acid which forms a chemical bond when processed.

Zinc generally becomes more available when combined and applied with a good nitrogen source. To insure that maximum zinc uptake is obtained we have incorporated a nitrogen source in our Start-up product line.

'Information regarding the content and levels of metals in this product is available by 1400-542-6664'.

START-UP is a Registered Trademark of Western Nutrients Corporation.
