GROWMORE

CITRA-GROW Potassium

FOLIAR

0-0-20

GUARANTEED ANALYSIS

Soluble Potash (K_2O).....20.0%

Derived from Potassium Hydroxide, Acetic Acid, Citric Acid

CAUTION

KEEP OUT OF REACH OF CHILDREN

DENSITY: 10.9 LBS / GALLON

NET WT. ☐ 2.5 Gals. ☐ 2 X 2.5 Gals.
☐ 1 Gallon ☐ 4 X 1 Gals.

GrowMore Citra-Grow is chelated with organic citric acid. The organic acid molecule which carries the metal into the plant tissues is easily and readily absorbed and metabolized within the plant. Citric acid also plays a major role in detoxification of plant root system and is particularly effective in protecting roots from the harmful effects of aluminum. Citric acid is important also in regulating the balance of cations and anions.

DIRECTIONS:

We recommend performing tissue test to determine crops utilization of potassium.

FIELD & VEGETABLE CROPS:

Foliar Feed: Use 2 to 3 quarts per acre (4.5 to 6.8 liters per HA). Apply at 4 to 5 true leaf stage or at bud stage before bloom. Subsequent applications can be made at 3 to 4-week intervals as needed. Use sufficient water for full coverage spray.

FRUIT, VINE & NUT CROPS:

Foliar Feed: Use 4 to 6 quarts per acre (9 to 14 liters per HA). Apply at bud swell or as pre-bloom spray. Subsequent applications can be every 4-6 weeks as needed. Use sufficient water for full coverage spray.

FRUIT: APPLES, PEARS OTHER DOME FRUIT:

Use 4 to 8 quart acre (9 to 18 Ltrs HA) in sufficient water for full coverage spray. Four applications are recommended, at green tip, pre-bloom pink bud; post bloom and early fruit formation.

PLUMS, NECTARINES, OTHER STONE FRUIT:

Use 4 to 8 quarts / acre (9 to 18 Ltrs HA) in sufficient water for full coverage spray. Four applications are recommended, at pink or white bud, post bloom, young fruit about 14-21 days after bloom then again 3 weeks later.

NUT CROPS:

Use 4 to 8 quarts / acre (9 to 18 Ltrs / HA) in sufficient water for full coverage spray. Four applications are recommended, at signs of first growth in spring, at pink or white but, at fruit set then again 14 to 21 days later.

MIXING-STORAGE-HANDLING:

Add Citra-Grow to tank when half-full. Perform jar test prior to using previously untried combinations. Protect from freezing.

COMPATIBILITY:

Dilute Citra-Grow prior to adding other spray chemicals. Grow More is compatible with most commonly used pesticides, herbicides, fungicides, amines and surfactants.

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

Information regarding the contents and levels of metals in this product is available on the internet at http://www.aapfco.org/metals.htm
