GUARANTEED ANALYSIS

Total Nitrogen (N) ....................................................... 3.0 %
1.0 % Other Water Soluble Nitrogen
2.0 % Urea Nitrogen
Soluble Potash (K20) ................................................... 8.0 %

DERIVED FROM: Urea, Protein Hydrolysate, Potassium Hydroxide

DRIP / TRICKLE IRRIGATION: The specific injection equipment and irrigation system must be conform to federal, state, and local regulations pertaining to the fertilization of plants through irrigation system and should be calibrated accurately prior to any application. The irrigation system should operate to achieve maximum distribution uniformity to avoid plant injury and/or ineffectiveness. For best results, apply VIVA toward the end of the irrigation cycle allowing for sufficient time for the product to be flushed out of the entire irrigation system before turning off the irrigation water. Flush and clean all parts with water including any pumps, hoses or nozzles after use of this product.

WEIGHT PER GALLON: 10.1 Pounds

NET VOLUME
2.5 Gallons (9.4 Liters)

NET WEIGHT
25.25 lb (11.4 kg)

<td>1.0 – 2.0 gallon per acre</td>
<td>1st application: 14 - 21 days after transplant or during early vegetative development. Subsequent applications: every 7 - 10 days.</td>
</tr>
</tbody>
</table>

Horticultural crops: use lower rates in multiple application programs after an initial application of 1 gallon per acre. Severe stress situations: up to double the high rates can be applied. When planting in sandy soils Viva must be used for each fertigation, reducing the dose to 0.5 - 1.0 gallon per acre.

**DIRECTIONS FOR MIXING**

Viva will be dispersed in water with little agitation. Any residue in pails is water-soluble. Triple rinse and add contents to the spray tank. Do not reuse container.

**TANK MIXES:** Do not mix with pesticides or any other chemicals without a compatibility test. An adequate test for compatibility involves mixing in a small container the proper proportions of the intended tank mix products with the intended volume of water. Agitate and let stand for one hour. If a precipitate forms then apply the products separately. Any tank mixes should be discussed and/or approved with your local distributor prior to mixing and application. Mix with liquid fertilizer by agitating thoroughly to disperse the elements.

**CONDITIONS OF SALE:** Seller warrants this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions and use. No one other than an officer of the seller is authorized to make any warranty, guarantee or direction concerning this product. Because time, place, rate of application and other conditions of use are beyond the seller’s control, the seller’s liability from handling, storage, and use of this product is limited to replacement of the product or a refund of the purchase price. It is impossible to eliminate all risks associated with use of this product. Crop injury, lack of performance, or other unintended consequences may result because of such factors as use of the product contrary to label instructions, abnormal conditions, presence of other materials, the manner of application, or other factors, all of which are beyond the control of Valagro USA or the seller. All such risks shall be assumed by buyer.
