KREBSTART™-F 0-22-28

F1837 - 11059 - 01 - Batch# - V021511OR

DESCRIPTION: Krebsstart-F is a foliar-applied liquid fertilizer product that is designed to provide nutrients that may be deficient in the soil or plant.

DIRECTIONS FOR USE: Krebsstart-F is generally compatible with most NPK foliar nutrients and pesticides. Adjusting the final spray tank pH to 5.0 with citric acid can enhance the compatibility of Krebsstart-F with Calcium, Iron, Manganese, Zinc and Copper. When mixing Krebsstart-F with other materials always establish compatibility using a standard quart jar method prior to mixing.

Krebsstart-F should be applied as a foliar spray. Spray in the late evening or early morning. DO NOT spray in the heat of the day. DO NOT spray when the plant is under moisture stress. Use as fine of a spray mist as possible. DO NOT spray to the point of runoff. Allow 3-4 hours after application before sprinkler irrigating to avoid washing the product off.

CROP TYPES	RATE (PER ACRE)	DETAILS
Field & Row Crops, Vegetable & Fruit Crops	1-4 quarts	Suggested total spray volume is 5-20 gallons/acre; rates should vary on severity of Phosphorus deficiency symptoms or on degree of weather extremes.
Orchards, Vineyards, & Greenhouse	1-4 quarts	Suggested total spray volume is 25-100 gallons/acre; rates should vary on severity of Phosphorus deficiency symptoms or on degree of weather extremes.
