GENERAL INFORMATION

1.1 lbs/gal of Nitrogen, out of 2.21 lbs/gal of the total Nitrogen in this product, is controlled release.

This product is recommended for use as a supplement to a regular fertilizer program only. CORON® is a liquid fertilizer with the unique properties that fit turf, ornamental and horticultural feeding needs. CORON® contains nitrogen from controlled release methylene ureas along with additional nutrients to provide a quick turf green-up and prolonged release. CORON® does not promote unnecessary surge growth and reduces clipping volumes, while minimizing nitrate leaching. CORON® is compatible with most fungicides, herbicides and insecticides to allow time-saving tank mix applications. CORON® is a true liquid solution that is easily applied with standard spray equipment.

PRECAUTION: Use of the product in accordance with label directions is not expected to adversely affect normal vegetative and/or reproductive growth in most situations. However, various environmental and agronomic factors, such as crop stress associated with high temperatures and/or dry conditions, make it impossible to eliminate all risks associated with the use of the product; therefore, crop injury is always possible. The user assumes all risks of use and handling. In an effort to reduce the risk of crop injury, apply early morning or late evening.
