SPRAY MIX COMPATIBILITY

NuCol™ is compatible with liquid fertilizer spray mixes at manufacturer's specified label rates. However, it is recommended that a compatibility "jar test" be performed prior to actual application. In the event of a fertilizer compatibility problem, the addition of a stabilizing/compatibility agent is recommended.

APPLICATION AND MIXING GUIDE

In any mixing operation NuCol™ should be introduced in the following sequence:

1. Water
2. Other Fertilizers or Pesticides
3. NuCol™
4. Approved compatibility agent (if needed according to jar test)

SUGGESTED DIRECTIONS

Use 0.5 gallon per acre as a banded or broadcast spray to soil or apply in irrigation water (sprinkler, micro, flood, or furrow). NuCol™ is recommended to be applied in combination with 1 - 2 qts. per acre Hydra-Hume™ Plus and 1-2 pts. per acre ECe-X® K.

TURF AND ORNAMENTALS: Broadcast spray or inject into irrigation at 6 fluid oz. per 1000 sq. ft. 1 - 3 times during the season. Application is targeted at the soil but foliar contact is not detrimental. Mix with deep root injections at 1 gallon per 10 gallons of injection solution.
