#### GENERAL INFORMATION

50% of the total Nitrogen in this product is controlled release. This product is recommended for use as a supplement to a regular fertilizer program only.

**CoBo™** is a patented formulation combining a unique foliar fertilizer that contains amino modified methylene urea and boron. **CoBo™ 12-0-0** is intended as a supplement to a regular fertilizer program and will not, by itself, provide all of the nutrition needs for a crop. However, it can improve the general plant condition by providing safe effective foliar nitrogen and boron.

**PRECAUTION:** Use of the product in accordance with label directions is not expected to adversely affect normal vegetative and/or reproductive growth in most situations. However, various environmental and agronomic factors, such as crop stress associated with high temperatures and/or dry conditions, make it impossible to eliminate all risks associated with the use of the product; therefore, crop injury is always possible. The user assumes all risks of use and handling. In an effort to reduce the risk of crop injury, apply early morning or late evening.

#### GENERAL RECOMMENDATIONS

**CoBo™** may be applied by air, ground or through irrigation systems. Use enough water for thorough, uniform coverage of foliage or soil. **CoBo™** is compatible with most pesticides and other fertilizers, but a "jar test" is recommended for unfamiliar tank mixes to ensure compatibility.
