

MIZER® is a concentrated blend of surfactants and polymers for application through irrigation systems.

MIZER makes better use of irrigation applied water on hydrophobic soils leading to savings in water use.

- ✓ *Low burn potential for both cool and warm season grasses*
- ✓ *Easy to mix even in cold water*
- ✓ *No excessive foaming problems*

CONTAINS NON-PLANT FOOD INGREDIENTS:

Active Ingredients

Polyhydroxyethyl alkoxy alkylene oxides.....	10%
Alkylpolyoxyethylene	15%
Inert Ingredients	75%
TOTAL	100%

BEFORE USING THIS PRODUCT READ ALL PRECAUTIONS, DIRECTIONS FOR USE, AND WARRANTY DISCLAIMER AND NOTICE

First Aid: If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **If on skin:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **If swallowed:** Call a poison control center or doctor immediately for treatment advice. Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. **If inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT, CALL 1-866-944-8565.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

DIRECTIONS FOR USE: MIZER® should be applied according to a managed application program. MIZER is designed to be applied via irrigation system using standard injection equipment and spray equipment. Guidance on the calibration of injection equipment is available from the equipment manufacturer.

Make the first application at the beginning of the growing season at the maximum rate and repeat 7 to 10 days later. Make further applications at the maintenance rate at 30-day intervals thereafter or as necessary as judged by the severity of the drought stress. MIZER does not require watering in after application. If wetting agents are used as part of the program, in all cases, these should be watered in immediately after application preferably by hand syringing or alternatively using automatic irrigation, which typically should be in operation for 20 minutes. This is especially important during warm or hot weather.

PPM Unit Calibration: The ppm unit has settings ranging from 1 to 10. The dilution rate varies according to several factors including temperature, pressure, flow rate and wetting agent viscosity. As a general guide the ppm unit is capable of injecting wetting agents between 0.75 and 17 oz/min dependent on the above factors.

To determine which setting to use on the ppm unit, make the following calculations:

$$\frac{\text{Area irrigated per cycle} \times \text{Rate of MIZER per acre in oz (normally 16 to 24 oz per acre)}}{\text{Average time per irrigation cycle (in minutes)}} = \text{ounces per minute}$$

APPLICATION RATES			
Dosage	Use Areas	Rate/Acre	Rate/1,000 sq. ft.
Maximum Rate	Golf green or tees, golf fairways and sports fields and other turf areas	32 oz	0.73 oz
Maintenance Rate	Golf green or tees, golf fairways and sports fields and other turf areas	16 to 24 oz	0.37 to 0.55 oz

STORAGE AND DISPOSAL

STORAGE: Store in cool, dry place. Store in original container. Keep tightly closed. Do not reuse empty container.

DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Dispose of contents/container on-site or at an approved waste disposal facility. Triple rinse (or equivalent) adding rinse water to spray tank. Offer container for recycling or dispose of container in sanitary landfill, or by other procedures approved by appropriate authorities. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrcycle.org.
