

TURF CMB

Liquid Fertilizer

GUARANTEED ANALYSIS:

Calcium as (Ca).....8.00%
Total Magnesium as (Mg).....1.00%
Boron0.25%

Derived from: Calcium Glucoheptonate, Magnesium
Glucoheptonate and Sodium Borate.

F248

CMB is a chelated liquid calcium compound that is designed to be a source of readily available calcium for turf grass. CMB is an economical tool for the management of calcium deficiency, nutrient availability, soil pH, and base saturation adjustment.

Application Recommendations:

CMB may be applied any time during the growing season when soil temperatures allow chemical reactivity.

Apply CMB at 2 gal. / acre initially followed by monthly applications of 1 gal. / acre.

Note: If calcium levels are extremely low, then replenish soil calcium with lime.

NET CONTENTS 2.5/GAL

Manufactured By: F248 Plant Food Systems, PO 775, Zellwood, Florida 32798
