### DIRECTIONS FOR USE

Apply only as directed. Use Andersons Golf Products Contec<sup>®</sup>DG<sup>®</sup> Dispersing Granule Technology 17-0-17 for greens, tees and other fine turf areas where a high nitrogen and potassium application is desired or when iron and manganese are needed to help correct or prevent deficiencies during the growing season.

Watering in this product will disperse each granule into thousands of particles. This will facilitate the movement of the nutrients into the soil. This particle dispersion will greatly reduce ball, shoe and mower pickup - minimizing nutrient loss.

### Application Rates:

LOW:	2.94 lbs./1,000 sq. ft.
HIGH:	5.88 lbs./1,000 sq. ft.

### For all applications:

- Immediately after application, apply a minimum of 0.2 inches of water to avoid possible staining and foot printing.

### Cool Season Grasses:

- Apply at the HIGH RATE during the growing season.
- Use the LOW RATE during mid-summer (non-greens usage).
- Exception: On bentgrass and *Poa annua*, apply at the LOW RATE if temperatures are 85°F or above.

### Warm Season Grasses:

- Apply at the HIGH RATE during the growing season.
- Use the LOW RATE during summer stress.
