21-28-7 Seed Starter

FEATURES & USE TIPS:

- Provides phosphate for use in new seeding, overseeding, sodding and sprigging operations.
- · Quick release nitrogen to encourage growth.
- Consistently sized particles for good product spreading and distribution
- SGN 215 for use on fairways, roughs and other turf areas.

PRODUCT SPECIFICATIONS:

N (21%): 10.96% Ammoniacal nitrogen

10.04% Urea nitrogen

P - as P₂O₅ (28%): Ammonium phosphate

K - as (K₂O) (7%): Potassium chloride

CI (5.91%): Maximum chlorine

Following is a specimen label that may at some point be revised or otherwise become out of date. It is intended as a guide in providing general information regarding the use of this product. Always read and follow the label on the product container.

PRODUCT CODE:

Date: 060607 Supersedes: 102505

Label: 2006

PRODUCT
CHARACTERISTICS:

Product Type:

Fertilizer

Nitrogen Type: Urea Nitrogen

Particle Size: SGN: 215

Net Weight: 50 lbs.

Coverage: 10,000 sq. ft @ Medium Rate

Bags / Pallet: 45

GENERAL INFORMATION

The Andersons Professional Turf Products 21-28-7 Seed Starter is a fertilizer designed for soil incorporation as a seed starter for turfgrass. The amount of available phosphate helps ensure proper germination, seedling growth, and root development of turfgrass. The coarse granular particle sizing of this product is carefully controlled for uniformity during application.

Mixing this product into the soil prior to seeding is ideal, since incorporation avoids the problem of limited phosphorus mobility when surface applied.

WHEN AND HOW TO USE

Fall and spring are the best seasons for establishment of seeded turf, since cooler soil temperatures favor the establishment of adequate root structure. Apply at 3.75 pounds per 1,000 square feet prior to seeding, mixing the granules well into the top 2-3° of soil by tilling, or premixing with the top soil mixture before its application. Then apply grass seed according to directions, along with moisture retaining and stabilizing mulch materials as required. Provide adequate moisture on a daily basis until the new grass is well established.

In severely phosphate-depleted soils, rates of up to double the above may be required for best results. To ensure that you have the best possible fertilization program, use fertilizers in conjunction with a soil and tissue test program operated by a state certified laboratory familiar with the soils

of your region. Cooperative extension agents can provide the names of recommended labs for your area.

Apply only as directed.

IMPORTANT: READ BEFORE USE:

Read the entire Directions for Use and the Warranty Disclaimer and Limitation of Liability before using this product. If terms are not acceptable, return the unopened product container at once. By using this product, user or Buyer accepts the following Warranty Disclaimer and Limitation of Liability:

WARRANTY DISCLAIMER and LIMITATION of LIABILITY:

Manufacturer warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the Label (when last in strict accordance with the directions.
