

# Fluid Fertilizer 29-2-3 with LN3® Nitrogen

## FEATURES & USE TIPS:

- Features LN3® water-soluble, controlled-release nitrogen.
- Contains a proprietary high concentration of LN3® as the slow-release nitrogen source.
- Clear solution for storage stability.
- Designed for spray application - no clogging.

What is LN3? LN3 is a water-soluble compound of formula  $C_5H_{11}N_5O$ . It is in the urea-triazone family, which is well known for excellent solubility in water.

## PRODUCT SPECIFICATIONS:

<b>N (29%):</b>	A minimum of 20.88% of the nitrogen is from slowly available urea-triazone solution. The remaining 8.12% is from urea.
<b>P - as <math>P_2O_5</math> - (2%):</b>	Potassium polyphosphate
<b>K - as <math>K_2O</math> - (3%):</b>	Potassium polyphosphate

## PRODUCT CODE:

**AGC83009**

**AGC29130**

Date: 091202  
Supersedes: 000000

## PRODUCT CHARACTERISTICS:

### **Product Type:**

Liquid Fertilizer

### **Nitrogen Type:**

Urea-triazone

### **Net Volume:**

5 Gallon Case -

AGC83009

30 Gallon Drum -

AGC29130

### **Coverage:**

2.5 Gallons Covers

1.79 Acres

at 0.1lb. N/M

30 Gallons Covers

21.5 Acres

at 0.1lb. N/M

Registered and guaranteed by The Andersons Lawn Fertilizer Division, Inc.; P. O. Box 119, Maumee, Ohio 43537

### DIRECTIONS FOR USE

Apply only as directed during the growing season. Fluid Fertilizer may be applied as a foliar spray application on all turfgrasses (cool season and warm season species). Also, this product may be applied on all turf including golf course greens, tees and fairways, athletic fields and lawn areas. It may be applied to both wet and dry foliage. Water turf before next mowing to remove fertilizer from foliage.

If tank mixing with pesticides, test compatibility before adding to the spray tank. Low N application rates (0.1 - 0.2 lbs. N per 1,000 sq. ft.) may be repeated at 7 - 10 day intervals. Moderate N applications (0.3 - 0.5 lbs. N per 1,000 sq. ft.) may be applied at 2 - 4 week intervals. Not recommended for use when planting new turf areas.

### Dilution Information:

Determine desired N application rate and intended dilution. Fertilizer should be applied at a finished spray solution volume of 2 - 4 gallons per 1,000 sq. ft. Add 1/2 of the total water to the spray tank. Activate sprayer agitation, measure appropriate volume of fertilizer concentrate to the spray tank. Bring spray tank to total volume of final solution. If tank mixing with pesticides, test compatibility before adding to spray mix. Perform a small jar test at the appropriate dilutions and allow to stand. Allow to stand, then check consistency of mix.

### IMPORTANT: READ BEFORE USE:

Read the entire Directions for Use and the Warranty Disclaimer and Limitation of Liability before using this product. If terms are not acceptable, return the unopened product container at once. By using this product, user or Buyer accepts the following Warranty Disclaimer and Limitation of Liability:

### WARRANTY DISCLAIMER and LIMITATION of LIABILITY:

Manufacturer warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions.
