DIRECTIONS FOR USE
Apply only as directed. Use Andersons Golf Products Turf Fertilizer 30-0-9 on actively growing fairways and roughs whenever a high nitrogen feeding with quick initial green-up and controlled-release nitrogen plus iron are desired.

Application Rates:
LOW RATE: 1.65 lbs./1,000 sq. ft.
MEDIUM RATE: 3.33 lbs./1,000 sq. ft.

For all applications:

- For use on fairways and roughs.
- DO NOT USE ON GREENS.
- Do not apply with a drop-type spreader.
- Apply to dry foliage.
- Water in after application with a minimum of 0.2 inches to help move particles into the turf canopy.
- Do not collect clippings for at least one mowing following application to avoid particle pick-up.

Cool Season Grasses:

- Apply at LOW RATE.
- Apply at MEDIUM RATE in spring or fall when deeper greening is desired.
- Exception: Apply at LOW RATE in mid-summer when temperatures are above 80°F.

Warm Season Grasses:

- Apply at LOW RATE.
- MEDIUM RATE may be used to help bring grasses out of dormancy in early spring (such as bermudagrass).
- Exception: Apply at LOW RATE during mid-summer when temperatures are extreme (90°F or above).

Notice: This product contains the micronutrient iron for extra greening and to help prevent iron deficiency. Iron may stain concrete and other surfaces. Misapplied product to these surfaces should be removed promptly by sweeping or blowing. Do not wash off with water.

Recent research has shown that well-maintained turf is an effective environmental buffer that prevents pollutants from entering our natural water bodies. To help protect these natural resources, avoid applying product to sidewalks, driveways, roadways, and other impervious surfaces. Sweep any misplaced granules back onto the area you are treating immediately after application. Since storm drains often empty directly to nearby waterways.

STORAGE AND USE

Store in a clean, dry place.
Reseal opened bag by folding top down and securing.
Use only in clean, dry spreaders.
Do not leave unused product in spreaders.
