DIRECTIONS FOR USE

For use on all turfgrasses used on golf course putting greens, tees, fairways and other fine turf areas.

WHEN TO USE:

Any time during the growing season while turf is actually growing. Apply at the MEDIUM RATE of 60 lbs./A (4.8 lbs. Fe/A) when an application of micronutrient package is desired. All applications should be watered immediately with 0.20 inches of water prior to any traffic. Repeat applications can be made after 6 weeks as needed. The HIGH RATE of 100 lbs./A (8 lbs. Fe/A) can be used to boost the micronutrient levels.

PRECAUTIONS:

Product should always be watered in after application prior to any traffic to aid particle dispersion and reduce potential for staining. Avoid mowing soon after application.

Product clumping may occur when the bag sets for a period of time. Clumps are easily broken up by dropping the bag to the ground several times before opening.

Notice: This product contains the micronutrient iron for extra greening and to help prevent iron deficiency. Iron may stain concrete and other surfaces. Misapplied product to these surfaces should be removed promptly by sweeping or blowing. **DO NOT WASH OFF WITH WATER.**

Do not apply product 2 or 3 days prior to an anticipated frost.

STORAGE AND DISPOSAL

Store in a clean, dry place. Reseal opened bag by folding top down and securing. Use only clean, dry spreaders. Do not leave unused product in spreaders.
