

# CROP GARD®

## GUARANTEED ANALYSIS

1-7-1

+ 2% S

|                                                            |       |                                         |       |
|------------------------------------------------------------|-------|-----------------------------------------|-------|
| Total Nitrogen (N) .....                                   | 1.00% | Soluble Potash (K <sub>2</sub> O) ..... | 1.00% |
| 1.00% Urea Nitrogen                                        |       | Sulfur (S) .....                        | 2.00% |
| Copper (Cu) .....                                          | 0.25% | 2.00% Combined Sulfur (S)               |       |
| Available Phosphate (P <sub>2</sub> O <sub>5</sub> ) ..... | 7.00% | Zinc (Zn) .....                         | 2.50% |
| Manganese (Mn) .....                                       | 0.50% | 0.05% Chelated Zinc (Zn)                |       |
| 0.05% Chelated Manganese (Mn)                              |       | 2.45% Combined Zinc (Zn)                |       |
| 0.45% Combined Manganese (Mn)                              |       |                                         |       |

Derived From Urea, Phosphoric Acid, Potassium Carbonate, Copper Sulfate, Manganese EDTA, Manganese Sulfate, Zinc EDTA, Zinc Sulfate. Chelating agent is Ethylenediaminetetraacetate

## DIRECTIONS FOR USE

### Suggested Rate per Acre

#### Method of Application

|                                                             | Field Crops   | Tree and Vine Crops |
|-------------------------------------------------------------|---------------|---------------------|
| Foliar broadcast or aerial spray .....                      | 1 to 2 quarts | 1 to 2 quarts       |
| Foliar banded spray .....                                   | 1 to 2 pints  | N/A                 |
| Sprinklers: solid set, pivot, linear, drag lines, etc. .... | 1 to 2 quarts | 1 to 2 quarts       |

**CROP-GARD®** is for use as part of an integrated plant disease prevention and management program. **CROP-GARD®** can be applied alone or used as a foliar carrier for nutrient sprays, fungicides, insecticides, plant growth regulators and some herbicides. Apply foliar sprays with sufficient water to ensure uniform coverage without running off leaf surfaces. This fertilizer is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by agricultural crops.

#### Conditions of sale:

The information contained on this label is believed to be accurate and reliable. Buyer and user acknowledge and assume all liability resulting from the use of this material. Follow directions carefully. Timing, method of application, weather, crop conditions and other factors are beyond the control of the seller.
