

DYNA GREENTM

IRON

PRODUCT INFORMATION

Dyna Green Iron is a liquid foliar formulation designed to correct and prevent iron deficiencies in most crops. If added to the spray tank first, it will aid in lowering the water pH. Check the compatibilities of untried chemical mixes. The addition of a non-ionic surfactant and/or urea nitrogen will aid in uptake. Do not use this product in aerial or ULV applications in combination with Magnesium nitrate on spinach or other iron-sensitive crops. Application of only Iron at 1 to 2 pints per acre if deficiency is evident will aid in correction.
