Florida Registration Number: 8507

Information

Diamond R Ultra MZF Nutritional Spray is a liquid foliar formulation designed for maximum uptake of zinc, manganese and iron. It should correct and prevent micronutrient deficiencies in most citrus varieties. If added to the spray tank first, it will assist in lowering the pH of the water. When tank mixing with other products check the compatibilities (jar-test) before mixing in application equipment. The addition of a non-ionic surfactant and/or urea nitrogen will aid in uptake.

Directions For Use:

Diamond R Ultra MZF Nutritional Spray should be applied at 2-3 quarts per acre in enough water to insure thorough coverage without significant runoff. Aerial application: 1-2 quarts per acre in a minimum of 10 gallons of water per acre.
