#### **General Information**

Entro is a patent pending micro emulsion concentrate combining an alkaline pH buffered methylated seed oil with a nitrogen-based fertilizer.

Entro enhances retention and penetration of herbicides sprayed onto weed surfaces and buffers the pH of the spray to minimize acid hydrolysis. The antifoam ingredient in Entro minimizes the formation of troublesome foam.

Entro will enhance the performance of many post-emergent herbicides such as Accent®, Accent® Gold, Betamix®, Betanex®, Progress®, Pursuit®, Raptor®, Stinger® and UpBeet®. Do not use Entro with Assert® herbicide. Entro is also suitable for use when the herbicide label recommends methylated or modified seed oil adjuvants.

#### **Directions For Use**

Use Entro at the rate of 1 to 2.5 gallons per 100 gallons of spray mixture (1% to 2.5% v/v) or as herbicide label recommends.

#### **Mixing Instructions**

Shake Entro prior to use. Always follow herbicide label recommendations regarding use of tank mix adjuvants. If there are no instructions for adjuvants stated on the herbicide label, tank mix Entro prior to adding the herbicides to the tank.

If using Entro with UpBeet herbicide, pre-slurry UpBeet in clean water prior to adding to the tank. This minimizes interference with the dissolution of the herbicide.

#### **SHAKE WELL BEFORE USE NOT FOR AQUATIC USE**

#### **Storage and Disposal**

**Storage:** Do not contaminate water, food or feed by storage or disposal. Do not store in freezing temperatures.

**Disposal:** Triple rinse container, then offer for recycling or reconditioning. Or, puncture and dispose of in a sanitary landfill or by incineration, if allowed by state and local authorities. If burned, stay out of smoke. Do not re-use empty containers.
