GENERAL INFORMATION

The manipulation of NPK ratios can effect plant development in order to achieve desired plant growth characteristics. The manipulation of amino acid and organic acid ratios in combination with NPK ratios will synergistically influence plant growth.

AMINOSOL solutions maximize plant health under various environmental and cultural growing conditions by utilizing unique **condition specific** amino and organic acid compounds to amplify the effects of NPK sources and NPK ratios.

AMINOSOL solutions utilize patented IDS chelated micronutrients to influence desired plant growth characteristics best suited to benefit the plant during variable growing conditions.

PRODUCT DESCRIPTION:

AMINOSOL 15-3-5 is specifically formulated for quick response and rapid plant growth.

AMINOSOL 15-3-5 contains urea nitrogen that will provide rapid plant foliage growth.

AMINOSOL 15-3-5 contains amino acids, plant extracts, micronutrients and surfactants to enhance and support rapid plant growth.

AMINOSOL 15-3-5 will produce rapid plant growth without causing the plant deformities.
