Recommended Use
Product Code

Perm-Up 25DF 70506-66 insecticide 12U-120

2. HAZARDS IDENTIFICATION

Emergency Overview

May cause irritation of respiratory tract

Highly toxic to fish and aquatic organisms. Keep out of drains and water courses.

WARNING!

Appearance off-white. Physical State Powder. Odor faint.

Potential Health Effects

Eyes Can cause slight to moderate irritation to the eyes...

Skin May cause sensitization by skin contact.

Inhalation Overexposure may cause irritation to the respiratory tract.

Ingestion Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Ingredients Name

Chemical Name	CAS-No	Weight %	OSHA PEL
Silicon dioxide	112926-00-8	10	6 mg/m³
Permethrin technical	52645-53-1	26.6	N/A

4. FIRST AID MEASURES

Eye Contact Hold eye open and rinse slowly and gently with water for 15

- 20 minutes. Remove contact lenses, if present, after 5

minutes, then continue rinsing eye.

Call a poison control center or doctor for treatment advice.

Skin Contact Take off contaminated clothing.

Rinse skin immediately with plenty of water for 15-20 minutes. Call poison control center or doctor for treatment advice.

Inhalation Move person to fresh air.

If person is not breathing, call 911 or an ambulance, then give

artifical respiration.

Call a poison control center or doctor for further treatment advice.

Ingestion Call a physician or Poison Control Center immediately

Have person sip a glass of water if able to swallow

Do not induce vomiting unless told to do so by a poison control

center or doctor

Never give anything by mouth to an unconscious person

Notes to Physician No information available

5. FIRE-FIGHTING MEASURES

Flammable Explosive Properties

Flash Point Not available Autoignition Temperature Not available

Flammability Limits in Air Not available

Extriguishing Media Carbon dioxide (CO2), Foam Dry chemical.

Fire/Explosion Hazard Slightly combustible. This material may support combustion at

elevated temperatures.

Hazardous Combustion Products Carbon monoxide, Carbon dioxide (CO2), chlorine, Hydrogen

chloride, Sulfur oxides.

NFPA Health 1 Flammability 1 Instability 0

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions Use personal protective equipment. Remove all sources of ignition. Avoid dust formation. Avoid

contact with the skin and the eyes.

Environmental PrecautionsConsult a regulatory specialist to determine appropriate state or local reporting requirements,

for assistance in waste characterization and/or hazardous waste disposal and other

requirements listed in pertinenet environmental permits..

Methods for Clean-upSweep up and shovel into suitable containers for disposal.

7. HANDLING AND STORAGE

Handling Do not eat, drink or smoke when using this product. Keep out of reach of children. Remove all

sources of ignition. Wear personal protective equipment. Avoid dust formation in confined

areas

Storage Store in an area where cross-contamination with pesticides, fertilizers, food or feed could not

occur. .

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure Guidelines

Chemical Name	ACGIH TLV	OSHA PEL
Silicon dioxide		6 mg/m³

Engineering Controls Investigate engineering techniques to reduce exposures. Local mechanical exhaust ventilation

is preferred. Consult ACGIH ventilation manual or NFPA Standard 91 for design of exhaust

systems. .

Personal Protective Equipment

Eye/face Protection Where there is potential for eye contact have eye flushing equipment available.. Use eye

protection to avoid eye contact. . Wear protective gloves/clothing.

Skin Protection

Respiratory Protection Avoid breathing dust. When airborne exposure limits are exceeded (see below), use NIOSH

approved respiratory protection equipment appropriate to the material and/or its components.

Consult respirator manufacturer to determine appropriate type equipmentfor given application.

Observe respirator use limitations specified by NIOSH or the manufacturer. . .

General Hygiene Considerations

Do not eat, drink or smoke when using this product. Wash hands and face before breaks and immediately after handling the product. Remove and wash contaminated clothing before re-use.

9. PHYSICAL AND CHEMICAL PROPERTIES

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance off-white Odor faint

Physical State Powder (1% solution)7.95 Ha **Boiling Point/Range** Melting Point/Range Not available Not available **Specific Gravity** 0.34 g/mL (tap) Solubility Dispersible in water **Evaporation Rate** Not available Vapor Pressure Not available **Vapor Density** Not available **VOC Content** Not available Not available No data available **Viscosity** Molecular Weight **Bulk Density** No data available **Percent Solids** Not available

Percent Volatiles Not available

10. STABILITY AND REACTIVITY

Stability Stable under recommended storage conditions

Conditions to Avoid Heat, flames and sparks

Incompatible Materials No materials to be especially mentioned.

Hazardous Decomposition Products

Toxic gases and fumes may be formed if product is involved in fire.

.

Possibility of Hazardous Polymerization Hazardous polymerisation does not occur

11. TOXICOLOGICAL INFORMATION

Acute Toxicity

Component Information

Permethrin - has low mammalian toxicity and virtually no allergic side effects and is not a skin or eye irritant. However, prolonged exposure might result in parathesia (tingling sensation), which is reversible within 12 hours. Exposure to permethrin is via dermal contact and inhalation. In repeat patch tests in humans, dermal applications of permethrin at 1% for up to 9 days did not result in irritation or sensitization. The clinical manifestations of inhalation exposure are confined to the upper respiratory tract and include rhinitis, sneezing, cough, and scratchy throat.

Silicon dioxide

(crystalline quartz) - prolonged inhalation of dusts containing free silica may result in the development of pulmonary fibrosis known as silicosis. The initial symptom associated with silicosis is shortness of breath. Progression of the condition results on marked fatigue, dyspnea and cyanosis, loss of appetite, and plueritic pain.

Chronic Toxicity

There are no known carcinogenic chemicals in this product

Carcinogenicity

IARC: (International Agency for Research on Cancer)

Listed (Silica)

12. ECOLOGICAL INFORMATION

Ecotoxicity

Permethrin in soil is stable over a wide range of pH values. When applied at agricultural use rates, permethrin has moderate rate of degradation in soil. At termicidal use rates, permethrin degrades at a slower rate which is governed by soil characterisitics such as soil type, microbial population, concentration in soil and aerobic conditions of soil. Due to its high affinity for organic matter, there is littile potential for movement in soil or entry into ground water. Permethrin has a low Pow of 6.1 but a low potential to bioconcentrate (BCF=500) due to the ease with which it is metabolized. . Permethrin

When applied at agricultural use rates, permethrin has a moderate rate of degradation in soil. At termicidal use rates, permethrin degrades as a slower rate which is governed by soil characteristics such as soil type, microbial population, concentration in soil, and aerobis conditions of the soils. Due to its high affinity for organic matter (Koc=86,000), there is little potential for movement in soil or entry into ground water. Permethrin has a Log Pow of 6.1, but a low potential to bioconcentrate (BCF= 500) due to the ease which it is metabolized.

Extremely toxic to fish LC50 = 0.05 ug/L to 315 ug/lExtremely toxic to aquatic arthopods LC50 =0.02 ug/L to 7.6 ug/L

Marine species are often more sensitive than freshwater species. Bacteria, algae, mollusks and amphibians are much more tolerant of permethrin than the fish and arthropods. Care should be taken to avoid contamination of the aquatic environment. Permethrin is slightly toxic to birds and oral LD50 values are greater than 3,600 mg/kg. Longer dietary studies showeed that concentrations of up to 500ppm in the diet had no effect on bird reproduction.

. Permethrin: This product is extremely toxic to fish, aquatic invertabrates, and honeybees. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other bodies of water unless in accordance with the requirements of a National Pollutant discharge Elimination system (NDPES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously motifying the local sewage treatment plant authority. For guidance, contact your State Water Board or the Regional Office of the Environmental Protection Agency.

FISH TOXICITY:

Rainbow trout LC50 (96 hr) 2.5 ug/L Bluegill sunfish LC50 (95 HR) 1.8 ug/L

AVIAN TOXICITY

Mallard duck LD50 11,275 mg/kg b.w. Japanese quail LD50 23,000 mg/kg b.w..

13. DISPOSAL CONSIDERATIONS

Waste Disposal Method

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide or rinsate is a violation of Federal law. If the wastes cannot be disposed of by use or according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. .

Contaminated Packaging Empty containers should be taken for local recycling, recovery or waste disposal
