Reduced Rates of Python WDG Plus Atrazine-Containing Pre-Mix Products for Preemergence Soil Applications to Field Corn

For Distribution and Use only in the State of Michigan

ATTENTION
†This recommendation is made as permitted under FIFRA 2(ee) and has not been submitted to or approved by the EPA or state lead pesticide agency.

- It as a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Read and follow all label precautions and limitations imposed by the label affixed to the container for this product.

Directions for Use

Reduced rates of Python* WDG can be tank mixed with labeled rates of atrazine-containing pre-mix products such as Bicep II, Bicep Lite II, Surpass 100, FulTime, Harness Extra, Guardsman, and Extrazine for improved control of certain broadleaf weeds not consistently controlled by atrazine pre-mix products. Reduced rates of Python tank-mixed with labeled rates of these atrazine pre-mix products will provide consistent preemergence control of velvetleaf, lambsquarters, pigweed species, waterhemp, and atrazine “resistant” varieties (triazine tolerant biotypes) of these species.

On soils with less than 3% organic matter, tank-mix Python at 0.8 oz/A with a labeled rate of the atrazine pre-mix product. On soils with greater than 3% organic matter, tank-mix Python at 1.0 oz/A with a labeled rate of the atrazine pre-mix product.

Python WDG Plus Atrazine-Containing Pre-Mix Products Rate Structure

<table>
