

2(ee) Recommendation

Use information in accordance with Section 2(ee) of FIFRA

DUPONT™ ENVIVE® HERBICIDE

EPA REG. NO. 352-756

PLUS DUPONT™ AFFORIA® HERBICIDE

EPA REG. NO. 352-889

FOR PREEMERGENCE CONTROL OF BROADLEAF WEEDS IN SOYBEANS IN THE STATE OF TEXAS

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Always read this FIFRA 2(ee) bulletin and the entire label on the product container before using this product.

ENVIVE® Herbicide at 2.0 ounces per acre can be tank mixed with AFFORIA® Herbicide at 1.25 ounces per acre for control of broadleaf weeds when applied preemergence to soybeans.

ROTATIONAL FLEXIBILITY

ENVIVE® at 2.0 ounces per acre plus AFFORIA® at 1.25 ounces per acre will provide a lower level of chlorimuron ethyl that will allow rotational flexibility to crops such as corn, cotton, rice and grain sorghum the following year regardless of soil pH while maintaining the needed flumioxazin rate.

SEQUENTIAL APPLICATIONS

On soils with a composite soil pH greater than 7.0, a total of 0.25 ounces active ingredient per acre of chlorimuron ethyl can be applied in a growing season. DuPont™ CLASSIC® Herbicide at 0.25 ounce per acre or other herbicides containing chlorimuron ethyl at an equivalent rate may be applied in a sequential postemergence application with appropriate tank mix partners. Carefully consider soil pH, use rate combinations and the Rotational Crop Guidelines for all product labels.

DuPont will not be responsible for losses or damages resulting from the use of this product in any manner not specifically instructed by DuPont. User assumes all risks associated with uses not specified by the label or DuPont 2(ee) instructions.

Read and follow all applicable directions, restrictions and precautions on the EPA-registered label for each product.

PRECAUTIONS AND RESTRICTIONS

Do not apply more than 1.53 ounces active ingredient flumioxazin per acre during a single growing season.

Do not apply to cracking soybeans or after the soybean crop has emerged because severe injury or death of the crop will occur.

Refer to the ENVIVE®, AFFORIA® and any other herbicide labels used as tank mix partners or in sequential applications for information on weed species controlled, additional use directions, restrictions, rotational crop intervals and precautions. The most restrictive provision on any label shall apply.

IMPORTANT NOTICE

BEFORE BUYING OR USING DUPONT PRODUCT(S) COVERED BY THIS BULLETIN, READ THIS BULLETIN, AND THE LABELS FOR ALL PRODUCTS REFERENCED IN THIS BULLETIN, IN THEIR ENTIRETY. FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS.

It is a violation of federal law to use this or any other pesticide product in a manner inconsistent with its labeling. This bulletin contains supplemental instructions for use of the referenced DuPont product. Follow these instructions carefully. This bulletin should be in the possession of the user at the time of application.

Read the Limitation of Warranty and Liability on the Section 3 Federal product label before buying or using THIS product. If terms are not acceptable, return the unopened package at once to Seller for full refund of purchase price paid. Otherwise, use by Buyer or any other User constitutes acceptance of the terms of the Limitation of Warranty and Liability on the Section 3 Federal product label.
