

FIFRA Sec. 2(ee) Recommendation

Technical Information Bulletin for the use of Trinity™ fungicide to control fairy ring (*Lycoperdon perlatum*) on golf course turfgrass in New Hampshire

EPA Reg. No. 7969-257

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA.

All applicable directions, restrictions, precautions and Conditions of Sale and Warranty on the EPA registered label are to be followed. Refer to the container label for additional instructions. Always read and follow label directions.

Information contained in this Technical Information Bulletin is not intended to replace or amend any product labeling. Always read and follow all label directions when using any pesticide alone or in tank mix combinations.

The user must have this recommendation in their possession at the time of use.

Directions For Use

Apply Trinity at 1.0 to 2.0 fl ozs/1000 sq ft (43.6 to 87.1 fl ozs/A) for control of fairy ring in turfgrass. For other application instructions, follow intervals and comments associated with the instructions for controlling Brown patch, Cool weather/Yellow patch, and Brown ring patch on the Trinity container label.
