Lorsban[®] Advanced

EPA Reg. No. 62719-591

Special 2(ee) Recommendation[†]

(For Distribution and Use Only in the States of Arizona and California)

Control of Bagrada Bug in Brassica (Cole) Leafy Vegetables

ATTENTION

[†]This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- Read the label affixed to the container for Lorsban[®] Advanced insecticide before applying. Carefully follow all precautionary statements and applicable use directions except as specified below.
- Use of Lorsban Advanced according to this Section 2(ee) recommendation is subject to all use precautions and limitations imposed by the label affixed to the container for Lorsban Advanced.

Directions for Use

Refer to product label for Lorsban Advanced for Use Precautions and Restrictions, Mixing and Application instructions.

Foliar Application [Brassica (Cole) Leafy Vegetables]

For control of Bagrada bug, apply 1.5 to 2.0 pints of Lorsban Advanced per acre as a foliar broadcast spray in a minimum spray volume of at least 20 gallons of water using power-operated ground spray equipment. Treat when nymphs and adults first become active and when field counts indicate damaging insect populations are developing or present. Consult your state agricultural experiment station or extension service specialist concerning Bagrada bug control practices in your area.

Refer to the product label for Lorsban Advanced for the specific use restrictions for foliar use of this product on Brassica (cole) leafy vegetables.
