Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

#### **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

A postemergence application of a Laudis® + Status® Herbicide tank mixture can be applied to seed corn for improved broadleaf control. The recommended application timing ranges from V2 thru V9 corn growth stages. Early postemergence application is recommended for best weed control and crop yield potential.

<b>Product</b>	<b>Rate</b>	<b>Crop</b>	<b>Weeds</b>

Status® Herbicide +	5-10 oz/acre +		
MSO or HSOC +	1.0% v/v or Recommended Rate +		
Nitrogen Source (UAN or AMS)	Recommended Rate (See Laudis® label)		

#### **Notes and Restrictions:**

- Before applying Status® Herbicide to seed corn, verify the selectivity on the inbred line or hybrid with your local seed corn company (supplier). This precaution will help avoid potential injury to sensitive lines from this tank mixture.
- Apply Laudis® spray mixtures within 24 hours of mixing to avoid product degradation.
- Avoid drift onto adjacent crops.
- For use directions, precautions and restrictions not addressed in this bulletin, follow the most restrictive directions on the respective labels of both partners in the tank mixture.

Use of this product according to this bulletin has not been reviewed or endorsed by the State of Indiana.
