Dear Dr. Shelton:

Re: FIFRA 2(ee) Recommendation for the Use of Admire Pro Systemic Protectant (EPA Reg. No. 264-827)

The New York State Department of Environmental Conservation has approved your FIFRA 2(ee) Recommendation for the use of Admire Pro Systemic Protectant (EPA Reg. No. 264-827) to control the unlabeled pest swede midge on cabbage, cauliflower, broccoli, Brussels sprouts, and radish.

Enclosed is the stamped "accepted" copy of the recommendation. If you have any questions regarding this letter, please contact me at 518-402-8768.

Sincerely,

Shaun Peterson

Pesticide Product Registration

Researcher and Title: A. M. Shelton, Professor of Entomology, Cornell/NYSAES

Target Crops: Cabbage, Cauliflower, Broccoli, Brussels Sprouts, and Radish

Target Pest: Swede midge, *Contarinia nasturtii*

Proposed Application Rate: 4.4-10.5 fl oz Product/A

Nature of 2(ee) Variation from Product Label: The current label does not include swede midge. This pest was first discovered in New York in 2004 and has caused considerable damage in some areas of the state. Our past work has shown that this product can be an effective insecticide against this pest (Wu, Q., J. Z. Zhao, A. G. Taylor and A. M. Shelton. 2006. Evaluation of insecticides and application methods against swede midge, a new invasive pest in the US. J. Econ. Entomol. 99:117-122).

Complete recommendation as it will appear in Cornell Recommends:

Trade name: Admire Pro Systemic Protectant

Rate/A Product: 4.4-10.5 fl oz Product/A
