APPLICATION METHOD & SAFETY:	<p>Nursery Mix line promotes nutrient healthy root development as well as a strong cell structure when used as a supplement to a soil fertilizer program. Micronutrients are needed for seed development, root structure and cell structure, especially in soil where the nutrients have been depleted in sufficient quantities to cause reduced yields or stunted plants. Western Nutrients Nursery Mix line insures against these nutrient deficiencies providing the essential nutrients to stimulate early root development and speed up plant growth.</p>
