**WARNING/AVISO**

#### Directions For Use

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- The supplemental labeling and the entire **Outlook® herbicide** container label, EPA Reg. No. 7969-156, must be in possession of the user at the time of application.
- Read the label affixed to the container for **Outlook** before applying.
- Use of **Outlook** according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for **Outlook**.

#### Product Information

**Outlook** is a selective residual herbicide for controlling many annual grasses, annual broadleaf weeds, and sedge as they germinate. Emerged weeds will not be controlled and must be controlled with an appropriate postemergence herbicide. Refer to **Table 1** on the **Outlook** container label for a complete list of weeds controlled.

#### Application Information

**Outlook** may be used as part of a weed management program in baby (first year planting) and mature hops. **Outlook** may only be applied by **ground (banded) application** (including postemergence-directed). Apply **Outlook** preemergence to weeds when hops are in the

dormant or early vegetative stages of growth. Incorporate **Outlook** as soon as possible after application for maximum weed control.

**Outlook** may only be applied in a single application.

**DO NOT** apply **Outlook** within 60 days of harvest of hops.

**Outlook** has not been tested on hops grown in all soil textures. Refer to **Table 2** on the **Outlook** container label for soil texture group descriptions. BASF recommends testing **Outlook** on a small portion of the target crop to confirm safety in the local soil type.

The maximum **Outlook** application rates in a single application are 12 to 18 fl ozs/A on coarse-texture soils and 14 to 21 fl ozs/A on medium-texture or fine-texture soils.

#### Crop-specific Restrictions and Limitations

- **DO NOT** apply to hops by air or through any type of irrigation system.
- **DO NOT** apply more than 21 fl ozs/A of **Outlook** per season.
- Depending on application timing, **Outlook** may negatively impact growth of cover crops planted in the fall after harvest.
- Contact with hop foliage by spray mixture or drift may cause injury.

#### Tank Mixes

Tank mixes with other herbicides, fungicides, insecticides, and fertilizers are not recommended when using this product in hops.
