

Section 24(c) Special Local Need Label

FOR DISTRIBUTION AND USE ONLY WITHIN FLORIDA

Subdue MAXX[®]
EPA Reg. 100-796
EPA SLN No. FL-110012

**Control of Basil Downy Mildew (*Peronospora belbahrii*) in Basil in
Transplants Grown for Re-sale to Consumers**

Active Ingredient: Mefenoxam*	22.0%
Other Ingredients:	78.0%
Total:	100.0%

* CAS No. 70630-17-0 and 69516-34-3

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR PEST CONTROL, CROP INJURY, OR ILLEGAL RESIDUES.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with all applicable directions, restrictions, and precautions found in the labeling of the federally registered product and accompanying supplemental labeling.

Follow all applicable directions, restrictions, and precautions including statements pertaining to the Worker Protection Standard, on the EPA-registered Subdue MAXX label.

This label must be in the possession of the user at the time of application.

Specific Use Directions

Plug Production*

Apply 3.75 oz/5000 sq. ft. (32 oz/A) as a soil surface spray to plug production trays after seeding and before seedling emergence in sufficient water to provide uniform coverage. Irrigate lightly after application to move the product into growing media profile, but not to the point of leaching. Make no more than one application during plug production phase. Follow the Subdue MAXX application with alternative chemistries on a weekly schedule implementing a preventative integrated disease management program.

Specific Use Restrictions

- Do not apply within 21 days of harvest (21-day PHI).
- Do not exceed the equivalent of 2.0 lb. a.i./A per crop of soil-applied mefenoxam containing products.

* Plug production refers to the production of a young plant grown from seed in a multi-celled germination tray for a short period of time. After growing to a desired size, the plug is then transplanted in a larger pot or container to grow to a larger size suitable to sell.
