DIRECTIONS FOR USE:

Foliar Applications :

- Apply in the spring or fall to stubble of harvested crops or fallow ground for control of weeds prior to emergence in no-till or conservation tillage systems.
- Authority MTZ may be tank-mixed with other herbicides labeled for use in fallow or eco-fallow applications. The addition of atrazine at 0.5-1.0 lb a.i./Acre can improve residual control of some weed species. Follow all label use directions, rotational guidelines and restrictions for any tank-mix partners and use the most restrictive guidelines.
- Apply Authority MTZ as a broadcast spray with either ground or aerial application equipment. Use a minimum of 10 gpa by ground or 5 gpa by aerial application.
- Tank-mix a labeled burndown herbicide such as Aim®, 2,4-D, dicamba, Gramoxone®, or Roundup® for control of emerged broadleaf or grass weeds.
- Follow all rotational crop restrictions following an application of Authority MTZ alone or in combination with other herbicides.
- Applicators: please be aware of the potential impact applications may have on endangered species. For specifics refer to this link http://www.fws.gov/montanafieldoffice/Endangered_Species/Listed_Species.html

RESTRICTIONS:

- Do not apply to frozen soils.
- Do not apply more than 20 oz/acre of Authority MTZ in a twelve month period.
- Do not apply more than 0.25 lbs a.i./acre of sulfentrazone for fallow applications or more than 0.375 lb a.i./acre sulfentrazone per twelve month period.
- Do not apply to soils classified as sand, with less than 1% organic matter.

Dealers Should Sell in Original Packages Only.
