

RESTRICTED USE PESTICIDE

DUE TO HIGH ACUTE TOXICITY TO HUMANS

For retail sale and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification. Direct supervision for this product requires the certified applicator to review federal and supplemental label instructions with all personnel prior to application, mixing, loading or repair or cleaning of application equipment.

2(ee) Recommendation

Use information in accordance with Section 2(ee) of FIFRA

DUPONT™ LANNATE® LV INSECTICIDE

EPA Reg. No. 352-384

FOR USE ON SOYBEANS FOR THE CONTROL OF SOYBEAN APHIDS IN THE STATES OF ALABAMA, ARKANSAS, COLORADO, DELAWARE, GEORGIA, ILLINOIS, INDIANA, IOWA, KANSAS, KENTUCKY, LOUISIANA, MICHIGAN, MINNESOTA, MISSOURI, MONTANA, MISSISSIPPI, NEBRASKA, NEW JERSEY, NORTH CAROLINA, NORTH DAKOTA, OHIO, OKLAHOMA, PENNSYLVANIA, SOUTH DAKOTA, TENNESSEE, VIRGINIA, WEST VIRGINIA, WISCONSIN, AND WYOMING

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in any way that will contact workers or other persons; either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe; consult the agency responsible for pesticide regulation. Always read this FIFRA 2(ee) bulletin and the entire label on the product container before using this product.

DuPont™ LANNATE® LV can be applied at 1/2 to 1 pt/a when Soybean Aphid (*Aphis glycine* Matsumura) populations reach locally determined economic thresholds. Consult the cooperative extension service, professional consultants or other qualified authorities to determine appropriate threshold levels for treatment in your area.

TANK MIXTURES

LANNATE® LV can be tank mixed with other insecticides, effective on soybean aphid, such as pyrethroids and others. When using a tank mixture with other insecticides, LANNATE® LV at 1/4 to 3/4 pints per acre achieves rapid knockdown of soybean aphids. When preparing a tank mixture, read and follow the label instructions for all products in the mixture regarding restrictions, requirements and proper usage.

APPLICATION

LANNATE® LV should be applied at 5 to 7 day intervals to maintain control. Use sufficient water to obtain thorough, uniform coverage. Since LANNATE® LV is a fast acting contact insecticide, best results follow direct spraying of the target insect. For aerial, use a minimum of 2 gallons per acre (gpa), and for ground, a minimum of 10 gpa.

NOTE:

Do not apply LANNATE® LV within 14 days of harvest.

Do not apply more than 1.35 pounds of methomyl (4.5 pints of LANNATE® LV) per acre per growing season.

Do not make more than a total of 3 applications of LANNATE®LV per crop.
