DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product through any type of irrigation system.

CLOVER SEED GROWN FOR SEED PURPOSES ONLY

For the control of the two-spotted spider mite.

For ground applications use 2 to 3 pints of COMITE in 25 to 40 gallons of water per acre. For air applications use 2 to 3 pints of COMITE in a minimum of 10 gallons of water per acre.

Restricted Entry Interval: Observe an REI of 9 days.

NOTES

All clover seed grown or conditioned as a non-food or non-feed site in the state of Idaho shall bear a tag or a container label which forbids the use of seed for human consumption or animal food. It shall be the grower's responsibility to notify the processing plants of any seed crop treated with COMITE.

No clover seed grown or conditioned as a non-food or non-feed site in the state of Idaho may be distributed for human consumption or animal feed.

The feeding of treated foliage, clover trash, or seed screening to livestock and the grazing of treated fields is prohibited.

CARROTS GROWN FOR SEED PURPOSES ONLY

For the control of the two-spotted spider mite.

Restricted Entry Interval: Observe an REI of 2 days.

Hand harvesting is prohibited for 13 days after application.

For air applications use 2 to 3 pints of COMITE in a minimum of 10 gallons of water per acre. Start applications as soon as mites appear.

NOTES

All carrot seed grown or conditioned as a non-food or non-feed site in the state of Idaho shall bear a tag or a container label which forbids the use of seed for human consumption or animal food. It shall be the grower's responsibility to notify the processing plants of any seed crop treated with COMITE.

No carrot seed grown or conditioned as a non-food or non-feed site in the state of Idaho may be distributed for human consumption or animal feed.

Follow all applicable directions, restrictions, and precautions on the EPA registered label.

This label must be in the possession of the user at the time of the pesticide application.
