Pathfinder* II

EPA Reg. No. 62719-176

2(ee) Recommendation [†]

For Distribution and Use Only Within the State of Florida

For Control of Old World Climbing Fern (*Lygodium microphyllum*)

ATTENTION

[†] This recommendation is made as permitted under FIFRA 2(ee) and has not been submitted to or approved by the EPA or state lead pesticide agency.

- Read the label affixed to the container for Pathfinder II before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Pathfinder II according to this product bulletin is subject to all use precautions and limitations imposed by the label affixed to the container for Pathfinder II.

Directions for Use

Pathfinder* II herbicide, a ready-to-use product, is labeled for the control of unwanted woody plants by basal bark application on the following use sites: forests, rangeland and permanent pastures, and non-crop areas including, industrial manufacturing and storage sites, rights-of-way, non-irrigation ditch banks

Use and Dosage Recommendations:

Stem/Foliage Application for Control of Old World Climbing Fern: To control old world climbing fern, where the plants are invading and overgrowing host trees, apply Pathfinder II as a coarse low-pressure directed spray to thoroughly wet foliage and stems in a one- to three-foot band. Apply when the ferns are actively growing and not under environmental stress.

SPECIAL USE PRECAUTION: Direct the spray onto target plants and prevent the spray from coming into contact with the bark or foliage of the host tree, otherwise the host tree may be severely damaged or destroyed by the treatment. Where necessary, use an impervious shield of wood, plastic, or metal to prevent spray from contacting the host tree.
