Technical Information Bulletin for the Use of Beyond[®] Herbicide to Aid in the Control of Devil's Claw (*Proboscidea louisianica*) in Clearfield Sunflowers in Kansas

EPA Reg. No. 241-379

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA.

All applicable directions, restrictions, precautions, and Conditions of Sale and Warranty on the EPA label are to be followed. Refer to the container label for

additional instructions. Always read and follow label directions.

Information contained in this Technical Information Bulletin is not intended to replace or amend any product labeling. Always read and follow all label directions when using any pesticide alone or in mix combinations.

The user must have this recommendation in their possession at the time of use.

This recommendation is for the use of Beyond herbicide to aid in Control of Devil's Claw in Clearfield sunflowers in Kansas.

DIRECTIONS FOR USE:

Apply **Beyond** to emerged devil's claw in **Clearfield** sunflowers at or prior to the four-leaf stage of the weed (devil's claw). **Use 4 fluid ounces of Beyond per acre** (0.032 lb imazamox a.e. /acre). Use the appropriate adjuvants as recommended by the **Beyond** label. **Beyond** will only provide control of emerged devil's claw at the four leaf stage or smaller. Control will be reduced significantly if the application is made following that leaf stage. **Beyond** provides no residual control of devil's claw that emerges after application.

Beyond can only be used on **Clearfield** sunflowers.

Beyond and **Clearfield** are registered trademarks of BASF.
